Subject: Request for Adoption of Technical Specification Task Force Traveler TSTF-514, Revision 3 (ME6698 and ME6699)

Mark/Bill,

Per LIC-109, the NRC staff completed acceptance review Carolina Power & Light Company request for review and approval of "License Amendment Request for Adoption of Technical Specification Task Force Traveler TSTF-514, Revision 3, "Revise BWR Operability Requirements and Actions for RCS Leakage Instrumentation," dated July 12, 2011, for Brunswick Units 1 and 2. The NRC staff finds this amendment request to be acceptable for review in that the submittal reasonably appears to contain sufficient technical information, both in scope and depth, for the NRC staff to complete the detailed technical review and render, in an appropriate time frame, an assessment of the requested action.

The acceptance review may result in some questions that will need to be addressed informally or formally prior to the completion of the staff's final review of the amendment request.

Thanks,

Farideh E. Saba, P.E.
