To: Robert.Poche@unistarnuclear.com
Cc: CCNPP3COL Resource; Ford, Tanya; Xu, Jim
Subject: FW: RAI 313 Clarification Call Attendees NP

The staff attendees were:

Jim Xu - Technical Reviewer
Tanya Ford – Chapter PM

Following is a brief summary of the discussions:

UniStar (the COL applicant) had requested the clarification call to discuss the significance of CCNPP FSAR Section 19.1.5.4.7, “Site-Specific PRA Based SMA for Soil Effects,” with respect to Draft RAI 313, Question 19-26. The call was held on July 15, 2011.

It was discussed during the call that AREVA (the DC applicant) has not yet completed its PRA-based SMA for the U.S. EPR design; therefore, the COL applicant will need to wait until the DC SMA is completed or work in parallel with the DC applicant to have the COL SMA update completed sooner. The staff stated that the COL applicant could not complete its SMA update prior to the DC SMA being completed. As a result of the phone call, both the COL and DC applicants stated they have a clear understanding of how to proceed with their respective PRA-based SMA analyses.

The staff also provided feedback on CCNPP FSAR Section 19.1.5.4.7 stating that this section will need to be revised to include the necessary information regarding the COL PRA-based SMA update. Specifically, the staff instructed the COL applicant to expand the current section to include how the PRA update will be done. The COL applicant stated they understand what is needed for the revision to this section.

The staff informed the applicant that in the final version of RAI 313, Question 19-26, the last paragraph would be removed. No other re-wording is necessary for RAI 313, Question 19-26 therefore; it is ready to be submitted to the applicant as final.
