Subject: HALT the AP1000 (Docket ID NRC-2010-0131)

Dear Secretary Vietti-Cook,

In the wake of the crisis at Fukushima, it has become clear that we cannot afford to take any unnecessary risks when building or revamping nuclear reactors. Because disaster can occur at any nuclear reactor, the NRC needs to ensure that it has taken any and all possible precautions before thinking of moving forward with the new Westinghouse AP1000 reactor design being considered for construction in Georgia, South Carolina and other states.

Addressing our safety concerns, not satisfying the regulated industry, should be the Nuclear Regulatory Commission's primary concern. NRC engineer John S. Ma's non-concurrence with the review of the reactor raised the possibility that the AP1000's shield building could shatter "like a glass cup." It would be absolutely indefensible for the NRC to move forward without further addressing that and any other weakness. Also, Westinghouse has not satisfactorily proved that the thin steel containment shell over the reactor would be effective during severe accidents or that the reactor could be properly cooled in conditions similar to those at Fukushima.

Especially considering the ongoing crisis in Japan and the review which will take place when the situation is brought under control in a few years, the current 75-day public comment period on the reactor design is insufficient for the new AP1000 reactor. I request that the NRC put the license application on hold until a thorough review of the Japanese accident has been conducted and weaknesses in the AP1000 design have been reviewed in light of the accident. To stick with the grossly inadequate 75-day rulemaking comment period would be the height of irresponsibility by the NRC.

Also, please accept the petition filed by the twelve environmental organizations of the AP1000 Oversight Group to suspend rulemaking. To ensure transparency, please include my comment and all others in the formal review proceedings and post them in the NRC's online library so the public can see any expressed concerns.
