 Lisle, IL 60532

REPORT NUMBER(S) 2011-001

3. DOCKET NUMBER(S)
 030-34598

4. LICENSEE NUMBER(S)
 13-2049-01

5. DATE(S) OF INSPECTION
 July 11 and 22, 2011

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied

_____ Non-cited violation(s) were discussed involving the following requirement(s):

- 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

- Main Office Inspection Next Inspection Date: July 2016
- Field Office Inspection _____
- Temporary Job Site Inspection _____

PROGRAM SCOPE

The licensee provides testing of "on-off" mechanisms and collecting leak testing services of fixed gauges, mainly thickness gauges to customers. They also provide installation and removal services of fixed gauges. They travel to 22 customers twice a year to perform these services. Customers have anywhere from 1 to 16 gauges. The average customer has 4 gauges. There are only 4 customers in the NRC jurisdiction area. Many of the sources they service are under a general license. They do very few installs and removals. Last year there were no installations but there are about 3 to 4 removals a year. The licensee ships the source to the appropriate person whether it is a manufacturer or a waste disposal vendor. The licensee sends wipes to a company in Texas for evaluation of the wipe test.

Temporary job site was not inspected as the licensee only performs temporary job sites in NRC jurisdiction area about 8 times a year. In order to inspect at a temporary job site, it is suggested to announce the inspection and schedule it for a period and a location when they are within NRC jurisdiction.

Performance Observations

No licensed activities were being performed at the time of inspection. Licensee personnel described procedures for leak tests, shutter checks, radiation surveys, and installation and relocation of gauges. Interview with licensee staff indicated sufficient knowledge of radiation safety principals. Inspector reviewed annual audit.
