SUBJECT: FORT CALHOUN STATION - NRC SECURITY INSPECTION  
REPORT 05000285/2011403

Dear Mr. Bannister:

On April 29, 2011, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Fort Calhoun Station. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were initially discussed on January 14, 2011, with Mr. Jeff Reinhart, Site Vice President, and subsequently discussed on April 29, 2011, with Mr. Woody Goodell, Division Manager, Nuclear Performance Improvement and Support, and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed personnel.

No findings were identified; however, a licensee-identified violation, which was determined to be of very low security significance, is listed in this report. Because of this violation's very low security significance, and because it is entered into your corrective action program, the NRC is treating this violation as a non-cited violation (NCV) consistent with Section 2.3.2 of the NRC Enforcement Policy. If you contest this NCV, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN.: Document Control Desk, Washington DC 20555-0001; with copies to the
