SUBJECT		
License No.: 21-02802-03		Control No.: 574858

SUMMARY

We have conducted a preliminary review your license amendment request dated March 28, 2011, and find that we are unable to continue this action until we have received information regarding the following:

1. In our discussion surrounding the most recent deficiency request, you have indicated that not all injections of PET isotopes will be conducted in the mobile trailer. Please provide a statement indicating that the limits stated in 10 CFR Part 20 will be adhered to.
RESPONSE: In a response dated June 15, 2011, the licensee confirmed that the limits specified in 10 CFR Part 20 will be adhered to. No additional information is required.
2. In our conversation surrounding the most recent deficiency request, you indicated that the mobile trailer will be limited to the use of materials authorized under 10 CFR 35.200. Please provide a written statement indicating the same.
RESPONSE: In response dated June 15, 2011, the licensee confirmed that materials used in the trailer will be limited to those permitted by 10 CFR 35.200. No additional information is required.
3. As discussed in our phone conversation, we have determined that the March 28, 2011, amendment request adequately describes the shielding. However, it was noted that, for future submissions, PET shielding analysis materials should be streamlined, to better convey relevant information. The request for a summary of shielding results was withdrawn.
RESPONSE: Response is adequate; no additional information is required.

No additional information is required at this time. Please reference the Control No. 574858, listed at the top of this memo, with any additional correspondence, relating to this action. Please direct any questions you have to me at (630) 829-9892.
