Subject: Re: FW: 2011 Draft New York IMPEP Report

Randy - I've finished reading through the revised draft IMPEP report. The revised language regarding the West Valley environmental monitoring position is fine - the situation is now accurately characterized. Other corrections were made as requested. However, I did find two spots where the language needs yet another tweak:

On page 22: The sentence that talks about the "DEC law" should be replaced with the following: "Articles 1, 3, 17, 19, 29, and 37 of the Environmental Conservation Law provides DEC with the authority to implement its radiation program."

On page 30, second paragraph - there is a new error that needs fixing. The sentence incorrectly says, "NYSERDA has always deployed TLDs at the Cornell site." To clarify: NYSERDA is not involved with the Cornell site. The sentence should instead say, "Cornell University has always deployed TLDs at its former land burial site."
Thanks for sending the revised draft for another look. I now realize I should have simply provided you with substitute language in the first place!

Sandy

Sandy,

I incorporated your suggested changes into the report and would like for you to take another quick look at it. We typically don't "resend" the corrected report back to the state, but in this case I think it's appropriate. In some of your comments you provided suggested language, but in others you didn't, you simply described the situation.

I sent your response to the team and none of them were opposed to your suggested changes. With this not being my area of expertise, I took a stab at making the changes you suggested. That's why I would like for you to take a look at those changes only (nothing else in the report was changed) and make sure I didn't mischaracterize anything, specifically in the area of the monitor position at the West Valley site.

If they are not correct, any suggested word changes would be appreciated.

Randy
