REGULATORY DOCKET FILE COPY

Subject: Reclassification of Reportable Occurrences
Reference: Letter DAEC-79-42, E. Hammond to J. Keppler,
dated March 12, 1979
Letter DAEC-79-43, E. Hammond to J. Keppler,
dated March 12, 1979
File: A-118a

Dear Mr. Keppler:

The above referenced letters provided prompt notification for reportable occurrences involving primary containment inerting and drywell to suppression chamber differential pressure. Our review of these two occurrences has indicated that all technical specification required actions were satisfied and that the events involved are most accurately described by Technical Specification paragraph 6.11.2.b.2. These occurrences should, therefore, have been classified as reportable occurrences requiring 30 day reports. Accordingly, reports concerning these two occurrences will be submitted within 30 days of the event date.

Very truly yours,

Elmer L. Hammond
Chief Engineer
Duane Arnold Energy Center
