Gentlemen:

We have reviewed the proposed modifications to the Rod Sequence Control System (RSCS) described in Amendment 15 to the Duane Arnold Energy Center Final Safety Analysis Report. Based on our review we find that the proposed RSCS modifications are acceptable; however, proposed Technical Specification changes related to the use of the RSCS should be submitted for our review. These proposed Technical Specifications should describe limiting conditions for operation and surveillance requirements for the revised system.

Because the revisions to the RSCS are scheduled to be made during the next refueling outage (now scheduled for February 15, 1976), your proposed Technical Specifications should be submitted prior to or with your reload application.

Please inform us if you have any questions concerning our requirements on this subject.

Sincerely,

151

George Lear, Chief  
Operating Reactors Branch #3  
Division of Reactor Licensing
