U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

RE: NRC/State Consultation pursuant to 10 CFR 50.91(b) effective May 6, 1983.

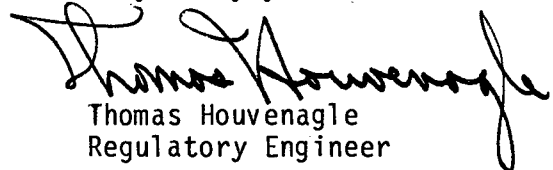

Dear Mr. Vassallo:

On August 22, 1984, this office received from Iowa Electric Light & Power Company a copy of its amendment (to Op License No. DPR-49) request dated August 20, 1984. The request related to deletion of a snubber listing from the Technical Specification in accord with GENERIC LETTER 84-13, and adjustment of two snubber testing requirements. The request was identified as proposed change RTS-161.

On December 3, 1984, this office received the monthly notice of amendment applications to the operating license involving no significant hazards consideration. AT 49 FR 42954 for November 21, 1984, the notice of the subject amendment request was included, and the basis of the NRC proposal for a no significant hazards consideration determination was explained.

This letter is to state that as the 10 CFR 50.91(b)(3) state consultation designated contact, I have no comment.

Very truly yours,

Thomas Houvenagle
Regulatory Engineer
