Mr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Duane Arnold Energy Center
Docket No: 50-331
Op. License No: DPR-49
RTS-115C, Appendix I Technical Specifications

Dear Mr. Denton:

Transmitted herewith is a revision to our application for amendment to Appendix A (Technical Specifications) to Operating License DPR-49 for the Duane Arnold Energy Center (DAEC). The application (RTS-115) was submitted by letter of August 29, 1979, LDR-79-172, and revised by our submittals of June 15, 1982, LDR-82-176, and April 6, 1983, NG-83-1147.

This revision, consisting of RTS-115C, incorporates comments from the meeting of July 15 1983 between representatives for Iowa Electric Light and Power Company and the NRC staff. This revision has been reviewed by the DAEC Operations Committee and the DAEC Safety Committee.

As stated in our previous application, Appendix B to the Technical Specifications is deleted in its entirety. Also, as stated in our previous application and discussed with the staff members, it is anticipated that complete implementation of this Technical Specification Amendment will require approximately 18 months following NRC issuance. The actual implementation time will depend on the actual amendment approved and will consider any potential plant modifications, purchasing additional equipment and training personnel.

A Class III amendment fee of \$4,000 was submitted with the original application. Since this is a revision to the application, no additional fee is required.

PROPOSED CHANGE RTS-115C
TO
DUANE ARNOLD ENERGY CENTER
TECHNICAL SPECIFICATIONS

The holder of License DPR-49 for the Duane Arnold Energy Center propose to amend Appendix A and Appendix B (Technical Specifications) to said license by deleting current pages and replacing them with the attached new proposed pages. A list of the affected pages is included.

For administrative purposes, the material on some pages has been moved to different pages in order to accomodate the addition and removal of new pages. In these instances only the page number is changed.

This revision to the application for amendment is submitted to incorporate comments discussed in the July 15, 1983 meeting between representatives for Iowa Electric and the NRC staff. The following is a summary of the proposed changes. Due to the scope of this change, the summary is not intended to be all inclusive, but is provided to point out the more significant changes.

- Appendix B to DPR-49 (Environmental Technical Specifications and Bases) is deleted in its entirety. This change was made in proposed change RTS-115A.
- Specification 3.2.D and Table 4.2.D are revised to reflect operational requirements for the steam air ejector offgas system pre-treatment and post-treatment monitors.
- Specifications 3.14.3, 3.15.3 and 3.15.4 have been modified to reflect annual dose limits.
- Table 4.14-2 and its notations are modified to provide additional clarification.
- Surveillance Requirement 4.15.5 has been added.
