Mr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

Our letter of May 21, 1976 transmitted an application (RTS-66A) for amendment of DPR-49 to incorporate changes to the Technical Specifications to bring them into compliance with 10CFR50 Appendix G. The NRC letter of February 7, 1977 requested additional information which was transmitted October 12, 1977. This submittal incorporates the information from our October 12, 1977 submittal and information from conversations with your staff into our May 21, 1976 submittal.

Transmitted herewith, in accordance with the requirements of 10CFR50.59 and 50.90, is an application for amendment of DPR-49 (RTS-66B) to incorporate proposed changes in Technical Specifications (Appendix A to License) for the Duane Arnold Energy Center (DAEC), described in the enclosure hereto.

This proposed change has been reviewed and approved by the DAEC Operations Committee and the DAEC Safety Committee and does not involve a significant hazards consideration. As this is an amendment to a previously submitted Technical Specification change, a check is not included.

Three signed and notarized originals and 37 additional copies of this application are transmitted herewith. This application, consisting of the foregoing letter and enclosures hereto, is true and accurate to the best of my knowledge and belief.
