Iowa Electric Light and Power Company

January 9., 1986
NG-86-0106

Mr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Duane Arnold Energy Center
Docket No: 50-331
Op. License No: DPR-49
Technical Specification Change (RTS-193)
Administrative Changes
File: A-117

Dear Mr. Denton:

In accordance with the Code of Federal Regulations, Title 10, Sections 50.59 and 50.90, Iowa Electric Light and Power Company hereby requests revision of the Technical Specifications (TS) for the Duane Arnold Energy Center (DAEC).

The proposed changes are being made to correct typographical errors, clarify existing text, restore language inadvertently changed and delete sections on environmental qualification superseded by 10 CFR 50.49.

The application (proposed change RTS-193) has been reviewed by the DAEC Operations Committee and DAEC Safety Committee. In accordance with the fee schedule for license amendments (10 CFR 170), a check for \$150 is enclosed. The balance of the fee will be paid upon billing.

Pursuant to the requirements of 10 CFR 50.91, a copy of this submittal, including the hazards considerations analysis, is being forwarded to our appointed state official.

EVALUATION OF CHANGE PURSUANT TO 10 CFR 50.92

This Technical Specification change proposal is strictly administrative, and is being done to correct typographical errors, clarify existing text, restore language inadvertently changed and delete sections on environmental qualification superseded by 10 CFR 50.49.

In accordance with the requirements of 10 CFR 50.92, the enclosed application is judged to involve no significant hazards based upon the following information:

- (1) Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response:

These changes are purely administrative and have no effect on the probability of occurrence or consequences of an accident.

- (2) Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response:

These administrative changes do not create the possibility for an accident of a new or different type from any accident previously evaluated.

- (3) Does the proposed amendment involve a significant reduction in a margin of safety?

Response:

These administrative changes have no effect on the margin of safety as defined in the basis for any technical specification.

In the April 6, 1983 Federal Register, the NRC published a list of examples of amendments that are not likely to involve a significant hazards concern. Example one of the list states:

"A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature."

This amendment request is purely administrative and, therefore, judged to fall into the above category.

PROPOSED CHANGE RTS-193 TO THE
DUANE ARNOLD ENERGY CENTER
TECHNICAL SPECIFICATIONS

The holders of license DPR-49 for the Duane Arnold Energy Center propose to amend Appendix A (Technical Specifications) to said license by deleting current pages and replacing them with the attached new pages. A List of Affected Pages is included.

The justification for the change is incorporation of administrative changes into various sections of the DAEC Technical Specifications as listed below:

- 1) On page iv of the Table of Contents, item 6.13 is changed to read "Deleted" because Section 6.13 on environmental qualification is being deleted by this proposed Technical Specification change.
- 2) On page 1.1-4, these headings are changed to read correctly "Safety Limit" and "Limited Safety System Setting". This language was inadvertently changed in a previous amendment.
- 3) In Table 3.2-B on page 3.2-8, Remark 2, the wording is changed to reflect the wording of Amendment 110. Amendment 123 inadvertently deleted this change.
- 4) On page 3.5-17, spelling error is corrected in first and second sentences of last paragraph (operabililty - operability).
- 5) On page 3.7-13, the words "must be taken out of power operation" have been added to the end of paragraph 6.c. These words were inadvertently removed by Amendment 114.
- 6) On page 3.8-10, the word "for" is added to clarify the meaning of the second sentence of the first paragraph.
- 7) On page 6.10-3, Section 6.10.2.9 is changed to remove the ambiguity between the lifetime record retention requirements of Section 6.10.2.9 and the five-year record retention requirements of Section 6.10.1.
On page 6.10-3, Section 6.10.2.12, regarding record retention for environmental qualification, is deleted because it has been superseded by 10 CFR 50.49, and subsequent sections are renumbered.
- 8) Page 6.11-15 (the notes to Table 6.11-2) is deleted. Table 6.11-2 was deleted by Amendment 105.
- 9) Page 6.13-1, Section 6.13 on environmental qualification of safety-related electrical equipment, is deleted because it has been superseded by 10 CFR 50.49.
