LARRY D. ROOT
ASSISTANT VICE PRESIDENT
NUCLEAR GENERATION

Mr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

This letter is submitted in response to Mr. Eisenhut's letter of November 20, 1980 which requested licensees to submit license amendment applications to incorporate surveillance requirements for mechanical snubbers.

The Duane Arnold Energy Center is currently in a refueling outage during which changes and modifications are being made which involve removal, relocation and addition of snubbers covered by the technical specification surveillance requirements. Because of these changes, a technical specification amendment submitted now would require modification within a few weeks to update the applicable tables.

As was discussed with Mr. Dick Clark of the NRC project office on April 9, 1981, Iowa Electric will submit the requested technical specification amendment application following revision of the tables to reflect the actual listing of snubbers as they exist after completion of the current refueling outage.
