Re: Duane Arnold Energy Center

Subject: 1981 Local Leak Rate Test Report

50-331

File: A-110, R/T-1

Dear Mr. Keppler:

DAEC Technical Specifications paragraph 4.7.A.2.f requires the subject report to be submitted to the Commission approximately three months after the conduct of the test. We had intended to submit this report by September 1, 1981. However, the report we had prepared was reviewed and found to be unacceptable. The report is being reworked into a form acceptable for submittal. We intend to provide the subject report by November 15, 1981. We are determined that the report provide a complete and accurate description of the testing which was performed.

We apologize for any inconvenience the untimely submittal of this report may cause. If you have any questions concerning this matter, please contact us at your convenience.

Very truly yours,

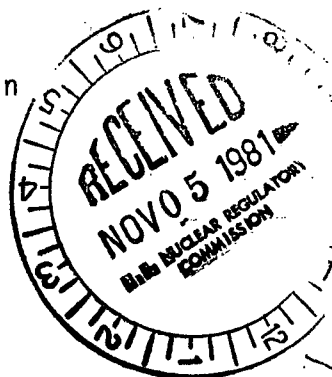

Daniel L. Mineck
Chief Engineer
Duane Arnold Energy Center
