Mr. James G. Keppler, Director
Office of Inspection and Enforcement
Region III
U.S. Nuclear Regulatory Commission
799 Roosevelt Road
Glen Ellyn, IL 60137

Subject: Performance Appraisal Branch Team
Review of the Duane Arnold Energy Center

Dear Mr. Keppler:

The purpose of this letter is to confirm conversations of October 22 and 27, 1981, between myself and Mr. Lee Spessard of your office. The subject review identified apparent discrepancies in the implementation of the Duane Arnold Energy Center Technical Specifications concerning the off-site Safety Committee and the on-site Operations Committee.

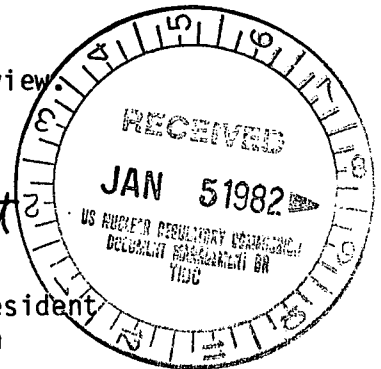

We have initiated a review of our Technical Specifications and their relationship to Safety Committee and Operations Committee Charters. As discussed with Mr. Spessard, we expect this to be an ongoing effort during the month of November.

We will keep you informed on the results of our review.

Very truly yours,

Larry D. Root

Larry D. Root
Assistant Vice President
Nuclear Generation
