DUANE ARNOLD
CHAIRMAN OF THE BOARD
AND PRESIDENT

February 3, 1978

Mr. Edson G. Case, Acting Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

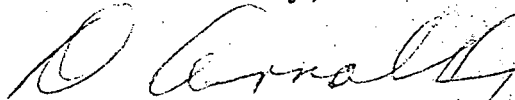

Dear Mr. Case:

This is to advise you that Iowa Electric Light and Power Company has recently made some management adjustments.

I have designated Dr. Samuel J. Tuthill, Vice President-Energy Resources and Utilization-Research and Environment, to be responsible for all electric production facilities, including the Duane Arnold Energy Center (DAEC.) Dr. Tuthill will be reporting to the Chairman of the Board and President. Mr. James A. Wallace, Vice President-Generation, with direct responsibility for DAEC management, will be reporting to me through Dr. Tuthill. The changes will not affect the functions and responsibility of Mr. Lee Liu, Vice President-Engineering with respect to licensing and NRC matters as indicated in my letter of October 3, 1975.

The attached organizational charts reflect our current management arrangement. Please contact us if you have further questions.

Sincerely,

Chairman of the Board and President

EXECUTIVE ORGANIZATION

Exhibit 1

FUNCTIONAL DIAGRAM
(Q.A.-N.S.C.)

Exhibit 4

LEGEND:

————— Management Reporting

- - - - - Appeal

==== Interface

Exhibit 4 shows the functional relationship between the executive responsible for DAEC operation and the Quality Assurance and the Nuclear Safety Committee.

The Vice President-Engineering has administrative responsibility for both the Quality Assurance Group and the Nuclear Safety Committee, including performance reviews, staffing, manpower and budget. However, regarding matters of DAEC operation and safety, both groups interface directly with the Vice President-Generation for resolution, as shown by the double line.

The double line also indicates that the Vice President-Generation can request either Quality Assurance or the Nuclear Safety Committee to perform review or audit services for him regarding the plant design and/or operation.

The Manager, Quality Assurance has a direct channel to the Chairman of the Board and President on matters not resolved to their satisfaction as indicated by the dashed line. The Nuclear Safety Committee reports are submitted to the Chairman of the Board and President's office directly.

This exhibit does not indicate the distribution of reports, recommendations and/or action requests.
