RE: NRC/State Consultation pursuant to 10 CFR 50.91(b) effective May 6, 1983.

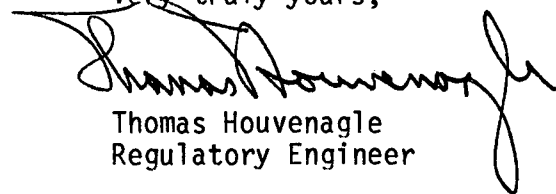

Dear Mr. Vassallo:

On July 21, 1983, this office received from Iowa Electric Light & Power Company a copy of its amendment (to Op License No. DPR-49) request dated July 20, 1983, relating to the addition of limiting conditions for the Reactor Core Isolation Cooling System, and identified as proposed change RTS-154.

On December 9, 1983, this office received the monthly notice of amendment applications to operating licenses involving no significant hazards consideration. At 48 FR 52816 for November 22, 1983, the notice of the subject amendment request was included, and the basis of the NRC proposal for a no significant hazards consideration determination was explained.

This letter is to confirm my March 9, 1984, call to Mr. Mohan Thadani, NRC project manager for DAEC, to state that as the 10 CFR 50.91(b)(3) state consultation designated contact, I have no comment.

Very truly yours,

  
Thomas Houvenagle  
Regulatory Engineer
