ASSISTANT VICE PRESIDENT
NUCLEAR GENERATIONMr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555Subject: Modification of Vacuum Breakers on Mark I Containments
(Response to Generic Letter 83-08)

Dear Mr. Denton:

This letter is submitted in response to Generic Letter 83-08 signed by Mr. Darrell Eisenhut on February 2, 1983. As requested in that letter, Iowa Electric will submit the results of the plant unique calculations which form the bases for modifications to the vacuum breakers. These calculations will be submitted on or before July 31, 1983.

As stated in Generic Letter 83-08, this issue is not included in the scope of the Mark I Containment Long Term Program as identified in NUREG-0661. We have established this as a separate task and will not include the resolution of this issue in the submittal of the Mark I Long Term Program -Plant Unique Analysis Report.

Any modifications required as a result of the plant unique calculations will be completed during the next refueling outage which is expected to occur during the fall of 1984.

Please contact this office if there are questions concerning this matter.

Very truly yours,

*Larry D. Root*Larry D. Root
