Integrated Plan Schedule B Changes
File: A-278

Dear Mr. Denton:

This letter provides the NRC with written notification of four changes in Schedule B, as required by Section V.B. of the "Plan for the Integrated Scheduling of Plant Modifications for the Duane Arnold Energy Center" (the Plan).

As we advised your staff on July 2, 1986, Iowa Electric Light and Power Company (IELP) has concluded that the completion dates of three IELP initiative items listed in Schedule B must be changed. These items are "Low-Level Radwaste Processing and Storage Facility - Storage and Processing Portions," "Construct Data Acquisition Center Facility," and "Training Facility."

Both the Storage and Processing Portions of the Low-Level Radwaste Processing and Storage Facility are currently scheduled for completion by July 31, 1986. Our revised completion date for both portions of this project is December 31, 1986. This schedule change is primarily due to construction and material shipment delays and a change in job scope.

The "Construct Data Acquisition Center Facility" item is currently scheduled for completion by August 31, 1986. Construction is being delayed because we unexpectedly discovered asbestos in the existing Administration Building where the Data Acquisition Center will be connected. The asbestos must be removed under a separate contract. Our revised completion date is October 31, 1986.

The "Training Facility" is currently scheduled for completion by September 30, 1986. This building is being delayed primarily due to unresolved settling problems in a portion of the foundation. Delays in shipment of key construction materials have also contributed to the delay. Our revised completion date is November 30, 1986.
