RE: NRC/State Consultation pursuant to
10 CFR 50.91(b) effective May 6, 1983.

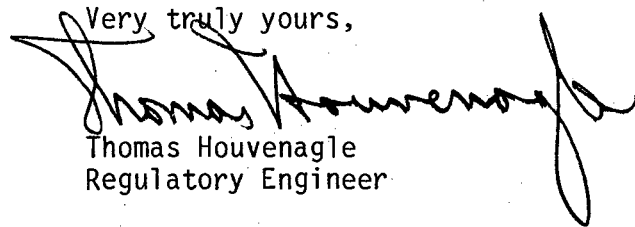

Dear Mr. Muller:

On May 30, 1986, this office received from Iowa Electric Light and Power Company copies of its amendment (to OP License No. DPR-49) request dated May 22, 1986. The request related to incorporation of NRC-recommended changes in testing of emergency diesel generators as per NRC generic letters 83-30 and 84-15; and NRC Info Notice 85-32. The request was identified at proposed change RTS-176.

On July 11, 1986, this office received the monthly notice of amendment applications to operating licenses involving no significant hazards consideration. At 51 FR 24257 for July 2, 1986, the notice of the subject amendment request was included, and the basis of the NRC proposal for a no significant hazards consideration determination was explained.

This letter is to state that as the 10 CFR 50.91(b)(3) state consultation designated contact, I have no comment.

Very truly yours,

Thomas Houvenagle
Regulatory Engineer
