U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

RE: NRC/State Consultation pursuant to 10 CFR 50.91(b) effective May 6, 1983.

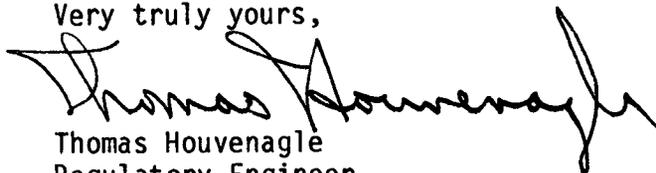

Dear Mr. Vassallo:

On November 14, 1984, and January 23, 1985, this office received from Iowa Electric Light & Power Company copies of its amendment (to Op License No. DPR-49) requests dated November 9, 1984, and January 18, 1985. The requests related to modification of fire detection/fire surveillance requirements for operation and maintenance situations which require fire barrier penetration. The request was identified as proposed change RTS-173.

On April 5, 1985, this office received the monthly notice of amendment applications to operating licenses involving no significant hazards consideration. AT 50 FR 12146 for March 27, 1985, the notice of the subject amendment request was included, and the basis of the NRC proposal for a no significant hazards consideration determination was explained.

This letter is to state that as the 10 CFR 50.91(b)(3) state consultation designated contact, I have no comment.

Very truly yours,

Thomas Houvenagle
Regulatory Engineer
