RE: NRC/State Consultation pursuant to 10 CFR 50.91(b) effective May 6, 1983.

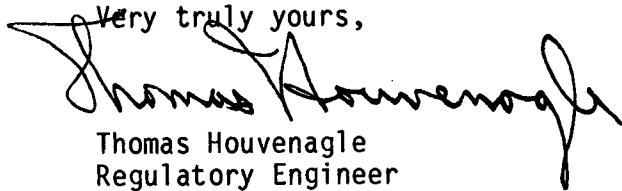

Dear Mr. Vassallo:

On December 27, 1984, this office received from Iowa Electric Light & Power Company copies of its amendment (to Op License No. DPR-49) request dated December 7, 1984. The request related to increasing certain containment isolation valve test pressures by 10%. The request was identified as proposed change RTS-177.

On April 5, 1985, this office received the monthly notice of amendment applications to operating licenses involving no significant hazards consideration. AT 50 FR 12146 for March 27, 1985, the notice of the subject amendment request was included, and the basis of the NRC proposal for a no significant hazards consideration determination was explained.

This letter is to state that as the 10 CFR 50.91(b)(3) state consultation designated contact, I have no comment.

Very truly yours,

  
Thomas Houvenagle  
Regulatory Engineer
