RE: NRC/State Consultation pursuant to 10 CFR 50.91(b)  
effective May 6, 1983.

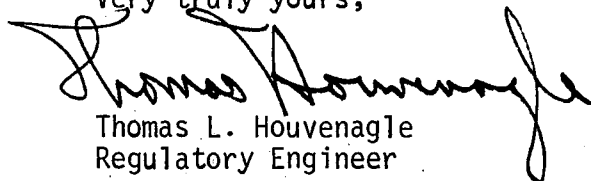

Dear Mr. Vassallo:

On July 22, 1985, this office received from Iowa Electric Light & Power Company copies of its amendment (to Op License No. DPR-49) request dated July 18, 1985. The request related to replacing ADS accumulator check valves with valves possessing improved leakage characteristics. The request was identified as proposed change RTS-184.

On August 26, 1985, this office received the monthly notice of amendment applications to operating licenses involving no significant hazards consideration. At 50 FR 32795 for August 14, 1985, the notice of the subject amendment request was included, and the basis of the NRC proposal for a no significant hazards consideration determination was explained.

This letter is to state that as the 10 CFR 50.91(b)(3) state consultation designated contact, I have no comment.

Very truly yours,

  
Thomas L. Houvenagle  
Regulatory Engineer
