Subject: STP - RWB Classification and Dose release

John,

This is short notice but if you can have someone to help to address, it'd be helpful.

Tier 1 departure 2.15-1 de-classifies the radwaste building to non-Category 1. Currently, the STP design of the RWB is non-seismic Category I and safety class IIb, in accordance with RG 1.143. From structural perspective, the design of the RWB meets IIb. But we don't know what STP has done to arrive to this classification because RG 1.143 does have dose release criteria to meet the IIa or IIb classification. Can someone help to point to the proper chapter (2.4 or 15.7 or where?)

If NINA is not ready for this afternoon (at 3 pm), I'll add this item to next week's agenda.

Regards

Tom Tai
