Docket No. 50-331

Iowa Electric Light & Power Company
 ATTN: Mr. Duane Arnold, President
 Security Building
 P. O. Box 351
 Cedar Rapids, Iowa 52406

Gentlemen:

During the course of our review of your application for an operating license, we discussed periodic verification of the response time of sensors in the reactor protection system. Your letter of January 11, 1974 stated that it was your intent to submit for review a program for performing this verification within six months after issuance of an operating license. By letter dated August 22, 1974, you stated that you have made studies, reviewed literature, and participated in industry committees regarding this subject, but as of the date of your letter, a satisfactory program had not been developed. Your August 22, 1975 letter stated that you intend to pursue this matter actively and that it remains your intent to submit a program for the verification of sensor response time as soon as a suitable program is available.

It is our position that a program for verification of sensor response time can be defined and implemented in accordance with the provisions of Section 4.10 of IEEE Standard 279-1968. Therefore, we request that you submit for our review a program for verification of the response time of sensors in the reactor protection system. We request that you submit your proposed program by February 15, 1976.

Please contact us if you need clarification of our request.

George Lear, Chief
 Operating Reactors Branch #3
 Division of Reactor Licensing
