LEE LIU
VICE PRESIDENT - ENGINEERING

Regulatory

File 6Y.

Mr. George Lear, Chief
Operating Reactors Branch 3
Division of Reactor Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Lear:

This letter is in response to your letter of October 24, 1975 requesting our position regarding modifications to the Main Steam Isolation Valve Leakage Control System (MSIV-LCS).

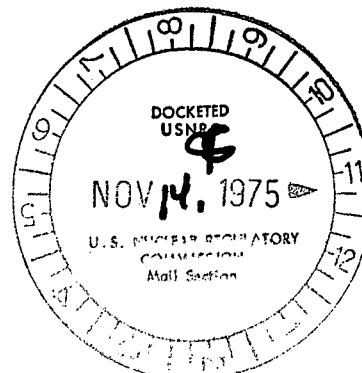

A positive interlock will be provided on each inboard main steam isolation valve (MSIV) which will preclude actuation of the leakage control system unless the inboard MSIV is fully closed. Proposed Technical Specifications for the MSIV-LCS and proposed Technical Specifications requiring $\geq 99.9\%$ DOP removal and $\geq 99.9\%$ halogenated hydrocarbon for the Standby Gas Treatment System will be submitted by January 15, 1976. The MSIV-LCS system is scheduled to be installed during our first refueling outage which is scheduled to commence February 15, 1976.

Very truly yours,

Lee Liu
Vice President, Engineering
