Gentlemen:

This letter confirms the telecon request of Mr. Walter Paulson on July 25, 1975 for one set of large scale P&ID's and electrical schematics (including motor operated valves and interlocks) for the Duane Arnold Energy Center ECCS and long term (post-LOCA) cooling systems.

These drawings are required to enable us to review your ECCS reevaluation dated July 8, 1975, and to reach the appropriate conclusions regarding the conformance of the Duane Arnold Energy Center with the requirements of 10 CFR Part 50, §50.46 and Appendix K.

Please contact us if you have any questions regarding this request.

Sincerely,

151

George Lear, Chief
Operating Reactors Branch #3
Division of Reactor Licensing
