CHARLES W. SANDFORD
EXECUTIVE VICE PRESIDENT

Mr. A. Giambusso
Deputy Director for Reactor Projects
Directorate of Licensing
Nuclear Regulatory Commission
Washington, D.C. 20545

Dear Mr. Giambusso:

The purpose of this letter is to request an extension of time for the installation of recirculation pump motor decouplers at the Duane Arnold Energy Center. Our present schedule calls for installation of this equipment during our first refueling outage. We request an extension of time to the first refueling outage after June 1, 1976.

The extension requested would allow further testing of decoupler equipment. The operating experience accrued in the interim would enable us to confirm the adequacy of the design and hence insure a more reliable decoupler.

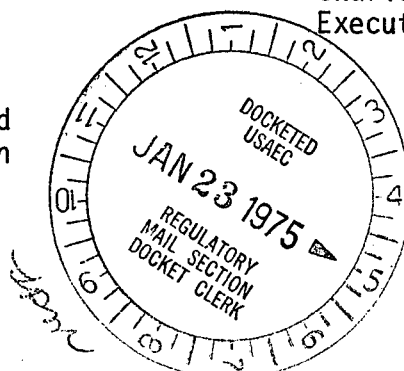

Also underlying our request for an extension of time is the position of the General Electric Company as set forth in their letter to you of August 23, 1974 which we endorse. In the interim, we would also hope that final review of WASH 1400, as well as further operating experience would provide a sounder basis for the regulatory staff to determine the necessity for this or any alternative design modification.

Very truly yours,

Charles W. Sandford
