LEE LIU

VICE PRESIDENT - ENGINEERING

**REGULATORY DUCKET FILE COPY**

**50-331**

Mr. Karl R. Goller  
Assistant Director for Operating Reactors  
Directorate of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20545

Dear Mr. Goller:

Your letter of February 4, 1977 requested information and commitments concerning torus water level and drywell to torus differential pressure. This letter is in response to your request.

Instrumentation which meets the minimum staff technical position will be installed at the Duane Arnold Energy Center during the spring 1977 refueling outage contingent upon availability of instrumentation. This installation will consist of one additional differential pressure readout channel and upgrading of the present torus water level channels as necessary. The refueling outage is scheduled from March 12 to April 16, 1977.

Iowa Electric will revise proposed Technical Specifications included in the amendment application of November 3, 1976, upon finalization of the design. This revision will include details of design change.

We will keep your office informed of our schedule.

Very truly yours,

*Larry D. Root*

Lee Liu *for*  
Vice President, Engineering
