LEE LIU  
VICE PRESIDENT - ENGINEERING

REGULATORY DOCKET FILE COPY

50-331

Mr. George Lear, Chief  
Operating Reactors Branch 3  
Division of Operating Reactors  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Lear:

Our February 12, 1976 letter to you stated that we would submit a proposed program for verification of sensor response time for selected instrumentation by September 1, 1976. The purpose of this letter is to request an extension of time to December 1, 1976.

Iowa Electric is presently evaluating proposals for development of a program to test:

- a) Reactor Vessel Steam Dome Pressure - High
- b) Reactor Vessel Water Level - Low
- c) Turbine Control Valve Fast Closure
- d) Main Steam Line Isolation Valve Closure
- e) Turbine Stop Valve Closure.

By December 1 Iowa Electric expects to have a complete program ready for implementation during the next refueling outage scheduled to commence March 15, 1977. Our December 1 submittal will include:

- a) Description of test equipment
- b) Description of test procedures
- c) Proposed Technical Specifications.

8763

Mr. George Lear  
IE-76-1293  
Page 2

This extension request does not delay implementation of our program to verify sensor response time as our original commitment had assumed that implementation of this program would take place during the 1977 refueling outage.

Very truly yours,

Lee Liu  
Vice President, Engineering
