Phil Lashley

FirstEnergy Nuclear Operating Company

Dear Mr. Lashley,

By letter L-11-236 dated July 26, 2011 (Agencywide Documents Access and Management System Accession No. ML11215A131), FirstEnergy Nuclear Operating Company (FENOC, the licensee) submitted a notice regarding limited liability conversion (LLC) and request for threshold determination under Title 10 of the *Code of Federal Regulation* (CFR), Section 50.80. Specifically, FENOC requested the U.S. Nuclear Regulatory Commission (NRC) make a threshold determination that the proposed conversion from a corporation to a LLC company does not involve any direct or indirect transfer of control of any NRC license that requires prior NRC written consent pursuant to 10 CFR 50.80.

The purpose of this e-mail is to provide the results of the NRC staff's acceptance review of this application. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily

apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to proceed with its detailed technical review and make an independent assessment regarding the acceptability of the proposed application in terms of regulatory requirements and the protection of public health and safety and the environment. If additional information is needed for the NRC staff to complete its technical review, you will be advised by separate correspondence.

If you have any questions, please contact me. A copy of this email will be made publicly available in ADAMS.
