ATTACHMENT A - SCHEDULE

A.1 PURPOSE OF GRANT

The purpose of this Grant is to provide support to the "A Course on Risk Analysis with Application to the Current and New Nuclear Plants and Fuel Cycle Facilities" as described in Attachment B entitled "Program Description."

A.2 PERIOD OF GRANT

- 1. The effective date of this Grant is August 22, 2011. The estimated completion date of this Grant is August 31, 2013.
- 2. Funds obligated hereunder are available for program expenditures for the estimated period: August 22, 2011 August 31, 2013.

A. GENERAL

1. Total Estimated NRC Amount: \$135,263.00
2. Total Obligated Amount: \$135,263.00

3. Cost-Sharing Amount: \$0.00

4. Activity Title: A Course on Risk Analysis with Application

to the Current and New Nuclear Plants and

Fuel Cycle Facilities

 \$135,263

A.4 AMOUNT OF AWARD AND PAYMENT PROCEDURES

1. The total estimated amount of this Award is \$135,263.00 for the two-year period.

- 2. NRC hereby obligates the amount of \$135,263.00 for program expenditures during the period set forth above and in support of the Budget above. The Grantee will be given written notice by the Contracting Officer when additional funds will be added. NRC is not obligated to reimburse the Grantee for the expenditure of amounts in excess of the total obligated amount.
- 3. Payment shall be made to the Grantee in accordance with procedures set forth in the Automated Standard Application For Payments (ASAP) Procedures set forth below.

Attachment B - Program Description

PROGRAM DESCRIPTION

This proposed effort will develop a course suitable for combined in person and distance learning delivery related to risk analysis. The fundamentals of the subject will be explored at a level appropriate to a fourth or fifth year senior engineering student, a graduate student, or a working nuclear professional. Specific examples and applications will be made to the nuclear power industry and fuel cycle facilities regulated by the NRC. In addition and importantly, this effort will explore new applications of the course subject matter to new and proposed advanced fuel cycle facilities. This broader study and application to the larger fuel cycle will also prepare graduates for work in the DOE (national labs), DHS, and related agencies where risk analysis may be applied to areas such as proliferation risk, nuclear security, transport of radioactive materials (including used fuel), etc.

This additional and novel focus is necessitated by the fact that a number of new fuel cycle facilities are under construction or have been proposed including enrichment plants based on centrifuge technology, MOX fuel fabrication, high temperature gas-cooled reactors and associated fuel fabrication facilities, and possibly other facilities for advanced used fuel processing, waste conditioning, long-term storage, recycled fuel fabrication, etc. Students receiving their degrees now should be adequately educated in these additional concerns and adequately trained in modern methods of risk analysis.

To illustrate the importance of the additional focus on operations and facilities related to advanced fuel cycles, it is useful to note some unique hazards presented by these new facilities including not only radioactivity but high heat generation (due to decay or self-heating reactions), fire related to the pyrophoric nature of some of the materials used in fabrication, explosion due to hydrogen generation or process chemicals, criticality involving fuels with high TRU content, opportunities for theft/diversion in fuel cycle facilities, etc. These and other hazards would be explored to illustrate the application of risk analyses to various current, new, and proposed facilities.

The course development will be comprehensive in that it will address traditional applications of probabilistic risk assessment to nuclear power plants but will also address more recent topics such as applications of risk information to power plant regulations i.e. risk-informed, performance-based regulation. Here one or more industry speakers will be sought from one of the nearby power plants to make a presentation on how this is implemented in the power industry. Such an event will also provide students the opportunity to interact with an industry professional working in this area and possibly motivate them toward this career path.

Scope

This effort would include course materials including a detailed course outline, instructors notes, Power Point slides, example industrial applications, homework problems and solutions,

suggested individual/group projects with working outlines for solution and evaluation of projects, and prepared lectures recorded digitally in Flash Format (using the software Camtasia). Smaller (introductory) course modules will be developed for use in other core courses where a brief outline of risk analysis is needed to meet the course objectives.

About the Applicants

The graduate NE program at USC offers MS (thesis and non-thesis options) and PhD degrees in nuclear engineering. The program began in 2003 with the first Masters degrees awarded in 2005 and first PhD degree in 2007. All of nearly three dozen graduates have found employment and have gone to work at four nuclear utilities, the NRC, SRNL, ORNL, DOD, reactor vendors, and nuclear related architect/engineering firms. The program also offers an undergraduate minor in nuclear engineering which provides valuable nuclear related education to prepare graduates for productive careers in the industry.

The USC graduate program is also available to distance learning students with more than sixty actively taking classes each semester. These students are working professionals seeking advanced degrees in nuclear engineering. Their desire to pursue the degree in most cases is a result of the increasing need for such training in their current jobs. These students come from positions in several utilities, NRC, NASA, vendors, architect/engineering firms, SRNL, and the

U.S. Navy's Nuclear Power School in Charleston.

The USC-NE program enjoys strong ties to the nuclear industry starting from its Advisory Board made up of four nuclear utility executives and managers from Westinghouse, AREVA, SRNL and a retired Navy Admiral while still others come from academia and education related organizations. These ties to the nuclear industry are bolstered by the many nuclear concerns in the state or close by in neighboring states. South Carolina obtains nearly 60% of its electricity from nuclear power with seven nuclear plants in the state. Two additional reactors are under construction only 30 minutes from Columbia and two others only one and half hours away in Georgia. The Westinghouse Fuel Fabrication Facility is located only minutes away from campus and Savannah River National Laboratory is only a little more than an hours drive away. Similarly other nuclear industrial concerns are a little more than an hour away in and around Charlotte, NC. These strong industrial ties help to connect students with employers and is additionally promoted by a special nuclear career day held each year on campus. The close proximity of these facilities allows for plant tours and seminars by nuclear professionals and robust interactions with the Local ANS Section.

ITEMIZED DISCUSSION

The following narrative identifies and responds to the key elements requested on pages 9 and 10 of the RFP.

Assessment Plan (benchmarks, milestones)

Weekly assessment will be made of developed materials during the development and delivery phases in the summer months. A close relationship exists between USC and personnel at V.C. Summer Nuclear Station and at SRNL. This access to key industry personnel provides a great resource to address any questions that would arise as to relevance of the materials to the industry.

A review will be conducted after completion of the first course offering in Summer 2011. This

will review for effectiveness of innovative teaching methods, lessons learned, evaluation of student feedback, etc. The university required student surveys and feedback will be reviewed as well as a special set of questions developed and tailored to solicit the desired feedback for this particular/new course offering. Feedback from industry professionals that participate in special guest lectures will also be sought following their participation. A similar review will be conducted after the 2012 offering.

The PI will meet with the student assistant on at least a weekly basis throughout the calendar year to review the subject matter researched and provide feedback and direction. The student supported under this effort will conduct literature searches and assist with developing problems and solutions.

Course Outline

The following topics will be developed over the two year period and implemented in the permanent, elective course on risk analysis.

- 1. Introduction to risk and reliability
 - a. NRC Safety Goal
 - b. Deterministic vs. probabilistic models
- 2. Introduction to relative risk comparison, risk acceptance, risk communication
- 3. Fundamentals of reliability and PRA
 - a. Probability, data manipulation, distributions
 - b. Reliability of systems, availability, maintainability, repair
 - c. Fault tree analysis
 - d. Event tree analysis
- 4. Application of PRA to:
 - a. Light-water reactors (include progression of accident scenarios in LWR, safety systems, etc.)
 - b. Storage and transport of radioactive materials (especially used fuel)
 - c. Fuel cycle facilities (possible example glovebox for MOX fuel fabrication)
- 5. Risk-informed, performance-based regulation
 - a. Distinguish deterministic approaches and defense in depth
 - b. Benefits of incorporating risk information
 - c. How is risk information utilized currently in nuclear regulation?
- 6. Other risk assessment:
 - a. Proliferation risk assessment; methods and modeling
 - b. Waste disposal risk assessment; methods and modeling
 - c. Nuclear facility security (nuclear security and safeguards, plant vulnerability)
- 7. Introduction to severe accident analysis
 - a. In-vessel phenomena
 - b. Ex-vessel phenomena
 - c. Capabilities and tools for modeling and computer codes
- 8. Introduction to radiological assessment
 - a. Input and methods related to Level 3 PRA
 - b. Source term
 - c. Radionuclide transport in the environment
 - d. Health effects
 - e. Land contamination

Elective or Permanent Course or Stand-alone Modules

The greatest part of the effort will develop a permanent elective course for students pursuing:

- engineering or other undergraduates at USC pursuing the minor in NE or otherwise desiring an elective to develop competency in this area
- graduate students pursuing MS or PhD in NE at USC
- Working professionals through distance learning graduate program. Note, working professionals can apply to take a course at USC as a non-degree student without being enrolled in a graduate program.

Additionally, **smaller modules** will be developed to support elements of risk analysis introduced in other courses. Examples include materials for use in the Nuclear Fuel Cycle course where risk comparison is made between different energy technologies. These summary/overview materials should additionally cover NRC Safety Goals, industry approaches to safety in design, PRA applied to the nuclear power industry, etc. Similar overview materials would be appropriate for the Reactor Systems course and possibly others.

These materials should also be used in *seminars and special talks* given at the universities and in the community to communicate these concepts to a wider audience to promote understanding and education of the subject matter broadly but also to encourage students to enroll in the course. USC faculty regularly give talks to community groups, local professional society meetings, and meetings of student bodies. Some recent examples include talks by the PI at Women in Nuclear Conference and American Association of Blacks in Energy both held in Columbia, SC.

Level: Undergraduate/Graduate

The course will target undergraduate seniors and graduate students both on campus (full-time) and distance learners (part-time working professionals). See more on the target audience above.

Estimated Number of Students to Reach

Typical enrollments in nuclear engineering related electives at USC for undergraduates and graduates ranges from 25 to 60 in each course in each semester. Given the broader appeal and application of these methods, it would be expected that enrollments and therefore numbers of students reached per course offering would be on the higher end of this range. It is expected that the course would be offered once each year.

Currently, an MOU exists between USC and South Carolina State University (SCSU) the only ABET accredited NE program at a historically black university. It allows students to take courses at the other institution without exchange of funds/tuition. This course would be available to SCSU students under that agreement and they would further have access to the course through distance learning and therefore not requiring them to leave campus. The number of students availing themselves of this option would depend on enrollment and need for a technical elective.

Criteria for Demonstrating Program is Sustainable

USC has the technical expertise and the programmatic incentive/need to offer such an elective course for its undergraduate and graduate students. In particular, non-thesis Masters students require more electives than Masters students completing a thesis. This additional course will provide diversity in elective course offerings permitting students to focus on key educational components that will most benefit them in their planned careers.

Technically, the course is sustainable as long as sufficient numbers of students enroll for each course offering. This minimum is usually around 12 students and historically NE related courses have met or even doubled or tripled this number. By offering the course in the summer it meets a critical need for a technical elective for undergraduate students taking summer classes. Since it is offered distance learning, students completing co-ops or internships can also enroll. Having course offerings in the summer is also critical for distance learning professionals in the graduate programs to enable them to complete the program of study in a reasonable amount of time. All these factors combine to ensure that the course will be offered consistently each year to a large class size for maximum impact and reach. An external metric would be the value placed on these subjects by the employers that hire our graduates. Our NE Advisory Board has indicated strong support for the proposed course subject matter (see also industry letter of support). Continued hiring of our graduates by the industry and feedback received on the continued value placed on these subjects will provide an even greater incentive to continue offering the course and indication of it sustainability. Other demonstrations of the value of the course will be participation by the industry in the form of special guest lectures/talks and plant visits where students can discuss and interact with working professionals in these areas.

Innovative Instructional Approaches

The University of South Carolina has long had a distance learning program and the graduate nuclear engineering program is offered on campus and to distance learning professionals in the industry. This effort will make use of new developments in technology for delivery using tablet PCs and video/audio capture software (i.e. Camtasia). This combination of tools enables the capture and narration of prepared slides from PowerPoint for example as well as annotations of these and hand written notes or thoughts as might be traditionally used with a blackboard in a classroom. Using this modality, it is convenient to include content such as figures or tables from the course text as well as supplemental texts, documents, and even video materials. Even more important, these tools enable the capture of active demonstrations of the use of modern risk analysis related computer codes and manipulations of these and data to perform rigorous analyses. By having access to recorded lecture materials, students can replay these lectures at their own computers as they engage with these modern computational tools and provides a robust teaching tool (tutorial). Further, some students are not always prepared when coming to class or need additional reinforcement of the material. The recorded materials means students can work at their own pace of learning providing something approaching individual help or assistance in addition to the live (in person) classroom experience. Of course, the instructor is still available for live, in-person consultation outside of class as well.

In addition to providing the recorded lecture materials, USC is moving to a live video and twoway audio format for the distance education delivery using **Adobe Connect**. This allows distance learners to see and hear the same materials as presented in the classroom and to engage the instructor in real-time similar to on campus students.

Additionally, industry professionals including many of the current adjunct faculty will be invited to give guest lectures to ensure that students have sufficient insight to the applications of these techniques in the industry and best prepare them to be productive and successful upon graduation. These lectures will be in addition to the normal seminar series that is held at the university and by incorporating as part of the class, these sessions will also be made available to distance learners through the methods described earlier.

Timeline or Milestone Chart of Activities

Year 1 (2010 - 2011):

- Development of core course materials (course outline numbers 1 to 8 above) starting May 2011:
 - o Literature search to capture the most recent developments and examples
 - o Detailed outline
 - o Lecture notes
 - Worked problems/examples
- Delivery Summer I&II (June and July)
 - o Continue development of parts of course in parallel
 - o Exams and homework problems developed with solutions

Year 2 (2011 - 2012):

- Development of (using development approach from Year 1):
 - o Nuclear security, waste disposal and proliferation risk assessments
 - o Introduction to reactor safety, codes, and severe accident analysis
 - o Introduction to radiological risk assessment
- Delivery Summer I&II (June and July)
 - o Additional exam and homework problems with solutions
- Development of smaller modules to be used as supporting materials in other courses where risk analysis is introduced.

Improvement of Education Infrastructure, Teaching Competencies, Skill in Serving Students

This proposed effort will:

- Expand use of state-of-the-art distance education delivery tools such as tablet PC, Camtasia, Adobe Connect, etc.
- Provide greater exposure of these tools to the faculty
- Better enable faculty to meet students need for instruction in and out of the classroom through recorded lectures (similar to talking textbooks).
- Improve knowledge and understanding of the faculty in regard to risk analysis through enhanced interactions with industry

Leveraging of Resources

The USC NE programs have made good use of federal support by leveraging industry, state, and university support. USC was awarded in 2009 a \$3M Center of Economic Excellence in Nuclear Engineering by the SC Research Centers of Economic Excellence. This endowment along with additional industry matching funds and university support for startup packages will enable the recruitment and hire of an endowed chair in nuclear engineering and two additional junior faculty members.

Industrial support has recently come in the form a gift/endowment in early 2010 from Progress Energy of \$100,000 to provide scholarships to undergraduate students pursuing the minor in nuclear engineering. Still more recently, a gift/endowment of \$500k from the industry will be announced in October of this year to similarly provide support for scholarships. Additional university support has come in the form of a commitment by USC of the ground floor (25,000 sq ft) of the new Horizon I building to nuclear engineering (move in date scheduled Fall 2011).

Attachment C - Standard Terms and Conditions

The Nuclear Regulatory Commission's Standard Terms and Conditions for U.S. Nongovernmental Grantees

Preface

This award is based on the application submitted to, and as approved by, the Nuclear Regulatory Commission (NRC) under the authorization <u>42 USC 2051(b)</u> pursuant to section 31b and 141b of the Atomic Energy Act of 1954, as amended, and is subject to the terms and conditions incorporated either directly or by reference in the following:

- Grant program legislation and program regulation cited in this Notice of Grant Award.
- Restrictions on the expenditure of Federal funds in appropriation acts, to the extent those restrictions are pertinent to the award.
- Code of Federal Regulations/Regulatory Requirements <u>2 CFR 215 Uniform</u>
 <u>Administrative Requirements</u> For Grants And Agreements With Institutions Of Higher Education, Hospitals, And Other Non-Profit Organizations (OMB Circulars), as applicable.

To assist with finding additional guidance for selected items of cost as required in <u>2 CRF 220</u>, <u>2 CFR 225</u>, and <u>2 CFR 230</u> this URL to the Office of Management and Budget Cost Circulars is included for reference to:

A-21 (now 2 CFR 220) A-87 (now 2 CFR 225) A-122 (now 2 CFR 230 A-102:

http://www.whitehouse.gov/omb/circulars index-ffm

Any inconsistency or conflict in terms and conditions specified in the award will be resolved according to the following order of precedence: public laws, regulations, applicable notices published in the Federal Register, Executive Orders (EOs), Office of Management and Budget (OMB) Circulars, the Nuclear Regulatory Commission's (NRC) Mandatory Standard Provisions, special award conditions, and standard award conditions.

<u>Certifications and Representations:</u> These terms incorporate the certifications and representations required by statute, executive order, or regulation that were submitted with the SF424B application through Grants.gov.

I. Mandatory General Requirements

The order of these requirements does not make one requirement more important than any other requirement.

1. Applicability of 2 CFR Part 215

a. All provisions of <u>2 CFR Part 215</u> and all Standard Provisions attached to this grant/cooperative agreement are applicable to the Grantee and to sub-recipients which meet the definition of "Grantee" in Part 215, unless a section specifically excludes a sub-recipient from coverage. The Grantee and any sub-recipients must, in addition to the assurances made as part of the application, comply and require each of its sub-awardees employed in the completion

of the project to comply with <u>Subpart C of 2 CFR 215</u> and include this term in lower-tier (subaward) covered transactions.

b. Grantees must comply with monitoring procedures and audit requirements in accordance with OMB Circular A-133. http://www.whitehouse.gov/omb/circulars/a133 compliance/08/08toc.aspx >

2. Award Package

§ 215.41 Grantee responsibilities.

The Grantee is obligated to conduct such project oversight as may be appropriate, to manage the funds with prudence, and to comply with the provisions outlined in <u>2 CFR 215.41</u> Within this framework, the Principal Investigator (PI) named on the award face page, Block 11, is responsible for the scientific or technical direction of the project and for preparation of the project performance reports. This award is funded on a cost reimbursement basis not to exceed the amount awarded as indicated on the face page, Block 16., and is subject to a refund of unexpended funds to NRC.

The standards contained in this section do not relieve the Grantee of the contractual responsibilities arising under its contract(s). The Grantee is the responsible authority, without recourse to the NRC, regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into in support of an award or other agreement. This includes disputes, claims, protests of award, source evaluation or other matters of a contractual nature. Matters concerning violation of statute are to be referred to such Federal, State or local authority as may have proper jurisdiction.

Subgrants

Appendix A to Part 215—Contract Provisions

Sub-recipients, sub-awardees, and contractors have no relationship with NRC under the terms of this grant/cooperative agreement. All required NRC approvals must be directed through the Grantee to NRC. See 2 CFR 215 and 215.41.

Nondiscrimination

(This provision is applicable when work under the grant/cooperative agreement is performed in the U.S. or when employees are recruited in the U.S.)

No U.S. citizen or legal resident shall be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity funded by this award on the basis of race, color, national origin, age, religion, handicap, or sex. The Grantee agrees to comply with the non-discrimination requirements below:

Title VI of the Civil Rights Act of 1964 (42 USC §§ 2000d et seq)

Title IX of the Education Amendments of 1972 (20 USC §§ 1681 et seq)

Section 504 of the Rehabilitation Act of 1973, as amended (29 USC § 794)

The Age Discrimination Act of 1975, as amended (42 USC §§ 6101 et seq)

The Americans with Disabilities Act of 1990 (42 USC §§ 12101 et seq)

Parts II and III of EO 11246 as amended by EO 11375 and 12086.

EO 13166, "Improving Access to Services for Persons with Limited English Proficiency."

Any other applicable non-discrimination law(s).

Generally, Title VI of the Civil Rights Act of 1964, 42 USC § 2000e et seq, provides that it shall be an unlawful employment practice for an employer to discharge any individual or otherwise to discriminate against an individual with respect to compensation, terms, conditions, or privileges of employment because of such individual's race, color, religion, sex, or national origin. However, Title VI, 42 USC § 2000e-1(a), expressly exempts from the prohibition against discrimination on the basis of religion, a religious corporation, association, educational institution, or society with respect to the employment of individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities.

Modifications/Prior Approval

NRC's prior written approval may be required before a Grantee makes certain budget modifications or undertakes particular activities. If NRC approval is required for changes in the grant or cooperative agreement, it must be requested of, and obtained from, the NRC Grants Officer in advance of the change or obligation of funds. All requests for NRC prior approval should be made, in writing (which includes submission by e-mail), to the designated Grants Specialist and Program Office no later than 30 days before the proposed change. The request must be signed by both the PI and the authorized organizational official. Failure to obtain prior approval, when required, from the NRC Grants Officer may result in the disallowance of costs, or other enforcement action within NRC's authority.

Lobbying Restrictions

The Grantee will comply, as applicable, with provisions of the Hatch Act (5 U.S.C. §§1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

The Grantee shall comply with provisions of 31 USC § 1352. This provision generally prohibits the use of Federal funds for lobbying in the Executive or Legislative Branches of the Federal Government in connection with the award, and requires disclosure of the use of non-Federal funds for lobbying.

The Grantee receiving in excess of \$100,000 in Federal funding shall submit a completed Standard Form (SF) LLL, "Disclosure of Lobbying Activities," regarding the use of non-Federal funds for lobbying within 30 days following the end of the calendar quarter in which there occurs any event that requires disclosure or that materially affects the accuracy of the information contained in any disclosure form previously filed. The Grantee must submit the SF-LLL, including those received from sub-recipients, contractors, and subcontractors, to the Grants Officer.

§ 215.13 Debarment And Suspension.

The Grantee agrees to notify the Grants Officer immediately upon learning that it or any of its principals:

- (1) Are presently excluded or disqualified from covered transactions by any Federal department or agency;
- (2) Have been convicted within the preceding three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or

destruction of records, making false statements, tax evasion, receiving stolen property, making false claims, or obstruction of justice; commission of any other offense indicating a lack of business integrity or business honesty that seriously and directly affects your present responsibility;

- (3) Are presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (1)(b); and
- (4) Have had one or more public transactions (Federal, State, or local) terminated for cause or default within the preceding three years.
- b. The Grantee agrees that, unless authorized by the Grants Officer, it will not knowingly enter into any subgrant or contracts under this grant/cooperative agreement with a person or entity that is included on the Excluded Parties List System (http://epls.arnet.gov).

The Grantee further agrees to include the following provision in any subgrant or contracts entered into under this award:

'Debarment, Suspension, Ineligibility, and Voluntary Exclusion

The Grantee certifies that neither it nor its principals is presently excluded or disqualified from participation in this transaction by any Federal department or agency. The policies and procedures applicable to debarment, suspension, and ineligibility under NRC-financed transactions are set forth in 2 CFR Part 180.'

Drug-Free Workplace

The Grantee must be in compliance with The Federal Drug Free Workplace Act of 1988. The policies and procedures applicable to violations of these requirements are set forth in <u>41 USC 702</u>.

Implementation of E.O. 13224 -- Executive Order On Terrorist Financing

The Grantee is reminded that U.S. Executive Orders and U.S. law prohibits transactions with, and the provision of resources and support to, individuals and organizations associated with terrorism. It is the legal responsibility of the Grantee to ensure compliance with these Executive Orders and laws. This provision must be included in all contracts/sub-awards issued under this grant/cooperative agreement.

Award Grantees must comply with Executive Order 13224, Blocking Property and Prohibiting Transactions with Persons who Commit, Threaten to Commit, or Support Terrorism. Information about this Executive Order can be found at: www.fas.org/irp/offdocs/eo/eo-13224.htm.

Procurement Standards. § 215,40-48

Sections 215.41 through 215.48 set forth standards for use by Grantees in establishing procedures for the procurement of supplies and other expendable property, equipment, real property and other services with Federal funds. These standards are furnished to ensure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal statutes and executive orders. No additional procurement standards or requirements shall be imposed by the Federal awarding agencies upon Grantees, unless specifically required by Federal statute or executive order or approved by OMB.

Travel

Travel must be in accordance with the Grantee's Travel Regulations or the US Government Travel Policy and Regulations at: www.gsa.gov/federaltravelregulation and the per diem rates set forth at: www.gsa.gov/perdiem, absent Grantee's travel regulation. Travel costs for the grant must be consistent with provisions as established in Appendix A to 2 CFR 220 (J.53). All other travel, domestic or international, must not increase the total estimated award amount.

Domestic Travel:

Domestic travel is an appropriate charge to this award and prior authorization for specific trips are not required, if the trip is identified in the Grantee's approved program description and approved budget. Domestic trips not stated in the approved budget require the written prior approval of the Grants Officer, and must not increase the total estimated award amount.

All common carrier travel reimbursable hereunder shall be via the least expensive class rates consistent with achieving the objective of the travel and in accordance with the Grantee's policies and practices. Travel by first-class travel is not authorized unless prior approval is obtained from the Grants Officer.

International Travel:

International travel requires <u>PRIOR</u> written approval by the Project Officer and the Grants Officer, even if the international travel is stated in the approved program description and the approved budget.

The Grantee shall comply with the provisions of the Fly American Act (49 USC 40118) as implemented through 41 CFR 301-10.131 through 301-10.143.

Property and Equipment Management Standards

Property and equipment standards of this award shall follow provisions as established in <u>2 CFR</u> 215.30-37.

Procurement Standards

Procurement standards of this award shall follow provisions as established in 2 CFR 215.40-48

Intangible and Intellectual Property

Intangible and intellectual property of this award shall generally follow provisions established in 2 CFR 215.36.

Inventions Report - The Bayh-Dole Act (P.L. 96-517) affords Grantees the right to elect and retain title to inventions they develop with funding under an NRC grant award ("subject inventions"). In accepting an award, the Grantee agrees to comply with applicable NRC policies, the Bayh-Dole Act, and its Government-wide implementing regulations found at Title 37, Code of Federal Regulations (CFR) Part 401. A significant part of the regulations require that the Grantee report all subject inventions to the awarding agency (NRC) as well as include an acknowledgement of federal support in any patents. NRC participates in the transgovernment Interagency Edison system (http://www.iedison.gov) and expects NRC funding Grantees to use this system to comply with Bayh-Dole and related intellectual property reporting requirements. The system allows for Grantees to submit reports electronically via the Internet. In addition, the invention must be reported in continuation applications (competing or noncompeting).

Patent Notification Procedures- Pursuant to EO 12889, NRC is required to notify the owner of any valid patent covering technology whenever the NRC or its financial assistance Grantees, without making a patent search, knows (or has demonstrable reasonable grounds to know) that technology covered by a valid United States patent has been or will be used without a license from the owner. To ensure proper notification, if the Grantee uses or has used patented technology under this award without license or permission from the owner, the Grantee must notify the Grants Officer. This notice does not necessarily mean that the Government authorizes and consents to any copyright or patent infringement occurring under the financial assistance.

<u>Data, Databases, and Software</u> - The rights to any work produced or purchased under a NRC federal financial assistance award are determined by <u>2 CFR 215.36</u>. Such works may include data, databases or software. The Grantee owns any work produced or purchased under a NRC federal financial assistance award subject to NRC's right to obtain, reproduce, publish or otherwise use the work or authorize others to receive, reproduce, publish or otherwise use the data for Government purposes.

Copyright - The Grantee may copyright any work produced under a NRC federal financial assistance award subject to NRC's royalty-free nonexclusive and irrevocable right to reproduce, publish or otherwise use the work or authorize others to do so for Government purposes. Works jointly authored by NRC and Grantee employees may be copyrighted but only the part authored by the Grantee is protected because, under 17 USC § 105, works produced by Government employees are not copyrightable in the United States. On occasion, NRC may ask the Grantee to transfer to NRC its copyright in a particular work when NRC is undertaking the primary dissemination of the work. Ownership of copyright by the Government through assignment is permitted under 17 USC § 105.

<u>Records Retention and Access Requirements</u> for records of the Grantee shall follow established provisions in <u>2 CFR 215.53.</u>

Organizational Prior Approval System

In order to carry out its responsibilities for monitoring project performance and for adhering to award terms and conditions, each Grantee organization shall have a system to ensure that appropriate authorized officials provide necessary organizational reviews and approvals in advance of any action that would result in either the performance or modification of an NRC supported activity where prior approvals are required, including the obligation or expenditure of funds where the governing cost principles either prescribe conditions or require approvals.

The Grantee shall designate an appropriate official or officials to review and approve the actions requiring NRC prior approval. Preferably, the authorized official(s) should be the same official(s) who sign(s) or countersign(s) those types of requests that require prior approval by NRC. The authorized organization official(s) shall not be the principal investigator or any official having direct responsibility for the actual conduct of the project, or a subordinate of such individual.

<u>Conflict Of Interest Standards</u> for this award shall follow OCOI requirements set forth in Section 170A of the Atomic Energy Act of 1954, as amended, and provisions set forth at <u>2 CFR 215.42</u> Codes of Conduct.

Dispute Review Procedures

- a. Any request for review of a notice of termination or other adverse decision should be addressed to the Grants Officer. It must be postmarked or transmitted electronically no later than 30 days after the postmarked date of such termination or adverse decision from the Grants Officer.
- b. The request for review must contain a full statement of the Grantee's position and the pertinent facts and reasons in support of such position.
- c. The Grants Officer will promptly acknowledge receipt of the request for review and shall forward it to the Director, Office of Administration, who shall appoint an intra-agency Appeal Board to review a grantee appeal of an agency action, if required, which will consist of the program office director, the Deputy Director of Office of Administration, and the Office of General Counsel.
- d. Pending resolution of the request for review, the NRC may withhold or defer payments under the award during the review proceedings.
- e. The review committee will request the Grants Officer who issued the notice of termination or adverse action to provide copies of all relevant background materials and documents. The committee may, at its discretion, invite representatives of the Grantee and the NRC program office to discuss pertinent issues and to submit such additional information as it deems appropriate. The chairman of the review committee will insure that all review activities or proceedings are adequately documented.
- f. Based on its review, the committee will prepare its recommendation to the Director, Office of Administration, who will advise the parties concerned of his/her decision.

<u>Termination and Enforcement.</u> Termination of this award by default or by mutual consent shall follow provisions as established in <u>2 CFR 215.60-62</u>,

Monitoring and Reporting § 215.50-53

- a. Grantee Financial Management systems must comply with the established provisions in 2 CFR 215.21
 - Payment 2 CFR 215.22
 - Cost Share 2 CFR 215.23
 - Program Income <u>2 CFR 215.24</u>
 - Earned program income, if any, shall be added to funds committed to the project by the NRC and Grantee and used to further eligible project or program objectives or deducted from the total project cost allowable cost as directed by the Grants Officer or the terms and conditions of award.
 - Budget Revision 2 CFR 215.25
 - o The Grantee is required to report deviations from the approved budget and program descriptions in accordance with 2 CFR 215.25, and request prior written approval from the Program Officer and the Grants Officer.
 - o The Grantee is not authorized to rebudget between direct costs and indirect costs without written approval of the Grants Officer.
 - The Grantee is authorized to transfer funds among direct cost categories up to a cumulative 10 percent of the total approved budget. The Grantee is not allowed

to transfer funds if the transfer would cause any Federal appropriation to be used for purposes other than those consistent with the original intent of the appropriation.

o Allowable Costs - 2 CFR 215.27

b. Federal Financial Reports

The Grantee shall submit a "Federal Financial Report" (SF-425) on a quarterly basis for the periods ending March 31, June 30, September 30, and December 31, or any portion thereof, unless otherwise specified in a special award condition. Reports are due no later than 30 days following the end of each reporting period. A final SF-425 is due within 90 days after expiration of the award. The report should be submitted electronically to:

<u>Grants_FFR@NRC.GOV.</u> (NOTE: There is an underscore between Grants and FFR).

Period of Availability of Funds 2 CFR § 215.28

- a. Where a funding period is specified, a Grantee may charge to the grant only allowable costs resulting from obligations incurred during the funding period and any pre-award costs authorized by the NRC.
- b. Unless otherwise authorized in <u>2 CFR 215.25(e)(2)</u> or a special award condition, any extension of the award period can only be authorized by the Grants Officer in writing. Verbal or written assurances of funding from other than the Grants Officer shall not constitute authority to obligate funds for programmatic activities beyond the expiration date.
- c. The NRC has no obligation to provide any additional prospective or incremental funding. Any modification of the award to increase funding and to extend the period of performance is at the sole discretion of the NRC.
- d. Requests for extensions to the period of performance should be sent to the Grants Officer at least 30 days prior to the grant/cooperative agreement expiration date. Any request for extension after the expiration date may not be honored.

Automated Standard Application For Payments (ASAP) Procedures

Unless otherwise provided for in the award document, payments under this award will be made using the Department of Treasury's Automated Standard Application for Payment (ASAP) system http://www.fms.treas.gov/asap/ Number the ASAP system, payments are made through preauthorized electronic funds transfers, in accordance with the requirements of the Debt Collection Improvement Act of 1996. In order to receive payments under ASAP, Grantees are required to enroll with the Department of Treasury, Financial Management Service, and Regional Financial Centers, which allows them to use the on-line method of withdrawing funds from their ASAP established accounts. The following information will be required to make withdrawals under ASAP: (1) ASAP account number – the award number found on the cover sheet of the award; (2) Agency Location Code (ALC) – 31000001; and Region Code. Grantees enrolled in the ASAP system do not need to submit a "Request for Advance or Reimbursement" (SF-270), for payments relating to their award.

Audit Requirements

Organization-wide or program-specific audits shall be performed in accordance with the Single Audit Act Amendments of 1996, as implemented by <u>OMB Circular A-133</u>, "Audits of States, Local Governments, and Non-Profit Organizations."

http://www.whitehouse.gov/omb/circulars/a133/a133.html Grantees are subject to the provisions of OMB Circular A-133 if they expend \$500,000 or more in a year in Federal awards.

The Form SF-SAC and the Single Audit Reporting packages for fiscal periods ending on or after January 1, 2008 must be submitted online.

- 1. Create your online report ID at http://harvester.census.gov/fac/collect/ddeindex.html
- 2. Complete the Form SF-SAC
- 3. Upload the Single Audit
- 4. Certify the Submission
- 5. Click "Submit."

Organizations expending less than \$500,000 a year are not required to have an annual audit for that year but must make their grant-related records available to NRC or other designated officials for review or audit.

III. Programmatic Requirements

Performance (Technical) Reports

- a. The Grantee shall submit performance (technical) reports electronically to the NRC Project Officer and Grants Officer on a semi-annual basis unless otherwise authorized by the Grants Officer. Performance reports should be sent to the Program Officer at the email address indicated in Block 12 of the Notice of Award, and to Grants Officer at:

 <u>Grants PPR.Resource@NRC.GOV.</u> (NOTE: There is an underscore between Grants and PPR).
- b. Unless otherwise specified in the award provisions, performance (technical) reports shall contain brief information as prescribed in the applicable uniform administrative requirements 2 CFR §215.51 which are incorporated in the award.
- c. The Office of Human Resources requires the submission of the semi-annual progress report on the SF-PPR, SF-PPR-B, and the SF-PPR-E forms. The submission for the six month period ending March 31st is due by April 30th, or any portion thereof. The submission for the six month period ending September 30th is due by October 31st or any portion thereof.
- d. Grant Performance Metrics:

The Office of Management and Budget requires all Federal Agencies providing funding for educational scholarships and fellowships as well as other educational related funding to report on specific metrics. These metrics are part of the Academic Competitiveness Council's (ACC) 2007 report and specifically relates to Science, Technology, Engineering, and Mathematics (STEM) curricula.

As part of the FY 2010 HR grant awards, in addition to the customary performance progress report requested on the SF-PPR, SF-PPR-B, and SF-PPR-E forms, HR requires the following metrics to be reported on by the awardees as follows:

Curriculum Development Awards

1. Overall number of new courses developed in NRC designated STEM areas;

- Number of students enrolled in new STEM courses:
- 3. Number of these enrolled students retained in STEM major.

Unsatisfactory Performance

Failure to perform the work in accordance with the terms of the award and maintain at least a satisfactory performance rating or equivalent evaluation may result in designation of the Grantee as high risk and assignment of special award conditions or other further action as specified in the standard term and condition entitled "Termination."

Failure to comply with any or all of the provisions of the award may have a negative impact on future funding by NRC and may be considered grounds for any or all of the following actions: establishment of an accounts receivable, withholding of payments under any NRC award, changing the method of payment from advance to reimbursement only, or the imposition of other special award conditions, suspension of any NRC active awards, and termination of any NRC award.

Other Federal Awards With Similar Programmatic Activities

The Grantee shall immediately provide written notification to the NRC Project Officer and the Grants Officer in the event that, subsequent to receipt of the NRC award, other financial assistance is received to support or fund any portion of the program description incorporated into the NRC award. NRC will not pay for costs that are funded by other sources.

Prohibition Against Assignment By The Grantee

The Grantee shall not transfer, pledge, mortgage, or otherwise assign the award, or any interest therein, or any claim arising thereunder, to any party or parties, banks, trust companies, or other financing or financial institutions without the express written approval of the Grants Officer.

Site Visits

The NRC, through authorized representatives, has the right, at all reasonable times, to make site visits to review project accomplishments and management control systems and to provide such technical assistance as may be required. If any site visit is made by the NRC on the premises of the Grantee or contractor under an award, the Grantee shall provide and shall require his/her contractors to provide all reasonable facilities and assistance for the safety and convenience of the Government representative in the performance of their duties. All site visits and evaluations shall be performed in such a manner as will not unduly delay the work.

IV. Miscellaneous Requirements

Criminal and Prohibited Activities

- a. The Program Fraud Civil Remedies Act (31 USC §§ 3801-3812), provides for the imposition of civil penalties against persons who make false, fictitious, or fraudulent claims to the Federal government for money (including money representing grant/cooperative agreements, loans, or other benefits.)
- b. False statements (18 USC § 287), provides that whoever makes or presents any false, fictitious, or fraudulent statements, representations, or claims against the United States shall be subject to imprisonment of not more than five years and shall be subject to a fine in the amount provided by 18 USC § 287.

- c. False Claims Act (31 USC 3729 et seq), provides that suits under this Act can be brought by the government, or a person on behalf of the government, for false claims under federal assistance programs.
- d. Copeland "Anti-Kickback" Act (18 USC § 874), prohibits a person or organization engaged in a federally supported project from enticing an employee working on the project from giving up a part of his compensation under an employment contract.

American-Made Equipment And Products

Grantees are herby notified that they are encouraged, to the greatest extent practicable, to purchase American-made equipment and products with funding provided under this award.

Increasing Seat Belt Use in the United States

Pursuant to EO 13043, Grantees should encourage employees and contractors to enforce onthe-job seat belt policies and programs when operating company-owned, rented or personallyowned vehicle.

Federal Leadership of Reducing Text Messaging While Driving

Pursuant to EO 13513, Grantees should encourage employees, sub-awardees, and contractors to adopt and enforce policies that ban text messaging while driving company-owned, rented vehicles or privately owned vehicles when on official Government business or when performing any work for or on behalf of the Federal Government.

Federal Employee Expenses

Federal agencies are generally barred from accepting funds from a Grantee to pay transportation, travel, or other expenses for any Federal employee unless specifically approved in the terms of the award. Use of award funds (Federal or non-Federal) or the Grantee's provision of in-kind goods or services, for the purposes of transportation, travel, or any other expenses for any Federal employee may raise appropriation augmentation issues. In addition, NRC policy prohibits the acceptance of gifts, including travel payments for Federal employees, from Grantees or applicants regardless of the source.

Minority Serving Institutions (MSIs) Initiative

Pursuant to EOs 13256, 13230, and 13270, NRC is strongly committed to broadening the participation of MSIs in its financial assistance program. NRC's goals include achieving full participation of MSIs in order to advance the development of human potential, strengthen the Nation's capacity to provide high-quality education, and increase opportunities for MSIs to participate in and benefit form Federal financial assistance programs. NRC encourages all applicants and Grantees to include meaningful participations of MSIs. Institutions eligible to be considered MSIs are listed on the Department of Education website: http://www.ed.gov/about/offices/list/ocr/edlite-minorityinst.html

Research Misconduct

Scientific or research misconduct refers to the fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results. It does not include honest errors or differences of opinions. The Grantee organization has the primary responsibility to investigate allegations and provide reports to the Federal Government. Funds expended on an activity that is determined to be invalid or unreliable because of scientific misconduct may result in a disallowance of costs for which the institution may be liable for repayment to the awarding agency. The Office of Science and Technology Policy at the White House published in the Federal Register on December 6, 2000, a final policy that addressed

research misconduct. The policy was developed by the National Science and Technology Council (65 FR 76260). The NRC requires that any allegation be submitted to the Grants Officer, who will also notify the OIG of such allegation. Generally, the Grantee organization shall investigate the allegation and submit its findings to the Grants Officer. The NRC may accept the Grantee's findings or proceed with its own investigation. The Grants Officer shall inform the Grantee of the NRC's final determination.

Publications, Videos, and Acknowledgment of Sponsorship

Publication of the results or findings of a research project in appropriate professional journals and production of video or other media is encouraged as an important method of recording and reporting scientific information. It is also a constructive means to expand access to federally funded research. The Grantee is required to submit a copy to the NRC and when releasing information related to a funded project include a statement that the project or effort undertaken was or is sponsored by the NRC. The Grantee is also responsible for assuring that every publication of material (including Internet sites and videos) based on or developed under an award, except scientific articles or papers appearing in scientific, technical or professional journals, contains the following disclaimer:

"This [report/video] was prepared by [Grantee name] under award [number] from [name of operating unit], Nuclear Regulatory Commission. The statements, findings, conclusions, and recommendations are those of the author(s) and do not necessarily reflect the view of the [name of operating unit] or the US Nuclear Regulatory Commission."

<u>Trafficking In Victims Protection Act Of 2000 (as amended by the Trafficking Victims Protection Reauthorization Act of 2003)</u>

Section 106(g) of the Trafficking In Victims Protection Act Of 2000 (as amended as amended, directs on a government-wide basis that:

"any grant, contract, or cooperative agreement provided or entered into by a Federal department or agency under which funds are to be provided to a private entity, in whole or in part, shall include a condition that authorizes the department or agency to terminate the grant, contract, or cooperative agreement, without penalty, if the grantee or any subgrantee, or the contractor or any subcontractor (i) engages in severe forms of trafficking in persons or has procured a commercial sex act during the period of time that the grant, contract, or cooperative agreement is in effect, or (ii) uses forced labor in the performance of the grant, contract, or cooperative agreement." (22 U.S.C. § 7104(g)).

Award Term

2 CFR 170.220 directs agencies to include the following text to each grant award to a non-federal entity if the total funding is \$25,000 or more in Federal funding.

Reporting Subawards and Executive Compensation.

- a. Reporting of first-tier subawards.
- 1. Applicability. Unless you are exempt as provided in paragraph d. of this award term, you must report each action that obligates \$25,000 or more in Federal funds that does not include Recovery funds (as defined in section 1512(a)(2) of the American Recovery and Reinvestment

Act of 2009, Pub. L. 111–5) for a subaward to an entity (see definitions in paragraph e. of this award term).

- 2. Where and when to report.
- i. You must report each obligating action described in paragraph a.1. of this award term to http://www.fsrs.gov.
- ii. For subaward information, report no later than the end of the month following the month in which the obligation was made. (For example, if the obligation was made on November 7, 2010, the obligation must be reported by no later than December 31, 2010.)
- 3. What to report. You must report the information about each obligating action that the submission instructions posted at http://www.fsrs.gov specify.
- b. Reporting Total Compensation of Recipient Executives.
- 1. Applicability and what to report. You must report total compensation for each of your five most highly compensated executives for the preceding completed fiscal year, if—
- i. the total Federal funding authorized to date under this award is \$25,000 or more;
- ii. in the preceding fiscal year, you received-
- (A) 80 percent or more of your annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at $\underline{2}$ CFR 170.320 (and subawards); and
- (B) \$25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at $\underline{2}$ CFR 170.320 (and subawards); and
- iii. The public does not have access to information about the compensation of the executives through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986. (To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at http://www.sec.gov/answers/execomp.htm.)
- 2. Where and when to report. You must report executive total compensation described in paragraph b.1. of this award term:
- i. As part of your registration profile at http://www.ccr.gov.
- ii. By the end of the month following the month in which this award is made, and annually thereafter.
- c. Reporting of Total Compensation of Subrecipient Executives.

- 1. Applicability and what to report. Unless you are exempt as provided in paragraph d. of this award term, for each first-tier subrecipient under this award, you shall report the names and total compensation of each of the subrecipient's five most highly compensated executives for the subrecipient's preceding completed fiscal year, if—
- i. in the subrecipient's preceding fiscal year, the subrecipient received-
- (A) 80 percent or more of its annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as defined at <u>2</u> CFR 170.320 (and subawards); and
- (B) \$25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts), and Federal financial assistance subject to the Transparency Act (and subawards); and
- ii. The public does not have access to information about the compensation of the executives through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986. (To determine if the public has access to the compensation information, see the U.S. Security and Exchange Commission total compensation filings at http://www.sec.gov/answers/execomp.htm.)
- 2. Where and when to report. You must report subrecipient executive total compensation described in paragraph c.1. of this award term:
- i. To the recipient.
- ii. By the end of the month following the month during which you make the subaward. For example, if a subaward is obligated on any date during the month of October of a given year (*i.e.*, between October 1 and 31), you must report any required compensation information of the subrecipient by November 30 of that year.
- d. Exemptions
- If, in the previous tax year, you had gross income, from all sources, under \$300,000, you are exempt from the requirements to report:
- i. Subawards.

and

- ii. The total compensation of the five most highly compensated executives of any subrecipient.
- e. Definitions. For purposes of this award term:
- 1. Entity means all of the following, as defined in 2 CFR part 25:
- i. A Governmental organization, which is a State, local government, or Indian tribe;

- ii. A foreign public entity;
- iii. A domestic or foreign nonprofit organization;
- iv. A domestic or foreign for-profit organization;
- v. A Federal agency, but only as a subrecipient under an award or subaward to a non-Federal entity.
- 2. Executive means officers, managing partners, or any other employees in management positions.
- 3. Subaward:
- i. This term means a legal instrument to provide support for the performance of any portion of the substantive project or program for which you received this award and that you as the recipient award to an eligible subrecipient.
- ii. The term does not include your procurement of property and services needed to carry out the project or program (for further explanation, see Sec. ____.210 of the attachment to OMB Circular A–133, "Audits of States, Local Governments, and Non-Profit Organizations").
- iii. A subaward may be provided through any legal agreement, including an agreement that you or a subrecipient considers a contract.
- 4. Subrecipient means an entity that:
- i. Receives a subaward from you (the recipient) under this award; and
- ii. Is accountable to you for the use of the Federal funds provided by the subaward.
- 5. *Total compensation* means the cash and noncash dollar value earned by the executive during the recipient's or subrecipient's preceding fiscal year and includes the following (for more information see 17 CFR 229.402(c)(2)):
- i. Salary and bonus.
- ii. Awards of stock, stock options, and stock appreciation rights. Use the dollar amount recognized for financial statement reporting purposes with respect to the fiscal year in accordance with the Statement of Financial Accounting Standards No. 123 (Revised 2004) (FAS 123R), Shared Based Payments.
- iii. Earnings for services under non-equity incentive plans. This does not include group life, health, hospitalization or medical reimbursement plans that do not discriminate in favor of executives, and are available generally to all salaried employees.
- iv. Change in pension value. This is the change in present value of defined benefit and actuarial pension plans.

- v. Above-market earnings on deferred compensation which is not tax-qualified.
- vi. Other compensation, if the aggregate value of all such other compensation (e.g. severance, termination payments, value of life insurance paid on behalf of the employee, perquisites or property) for the executive exceeds \$10,000.
