U.S. Nuclear Regulatory Commission
799 Roosevelt Road
Glen Ellyn, IL 60137

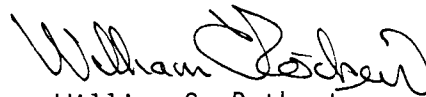

Re: Duane Arnold Energy Center
Subject: Docket No: 50-331
Op-License No: DPR-49
LPCI Swing Bus Design Modifications
Reference: 1) Letter (CAL), A. Davis to L. Liu, 9/2/88
2) Letter (NG-88-3787), W. Rothert to T. Murley, 11/4/88
File: A-107a, A-225, R-10

Dear Mr. Davis:

The purpose of this letter is to inform you that the design change addressed in your Confirmatory Action Letter (Reference 1) has been completed and declared operable at the Duane Arnold Energy Center. The design change modified the LPCI swing bus select logic to accommodate the loss of either division of 125 VDC power. The modification is in place to support the cycle 10 startup scheduled for later this week.

We will continue to follow-up on the post-startup related actions described in Reference 2. Should you have any additional questions regarding this matter, please contact this office.

Very truly yours,

William C. Rothert
Manager, Nuclear Generation Division
