Subject: Duane Arnold Energy Center
Docket No. 50-331
Operating License No. DPR-49
Reactor Containment Building Integrated Leak Rate Test
and Local Leak Rate Test
File: A-103, T-23i, A-100

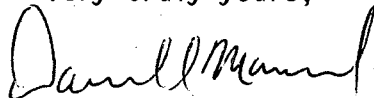

Dear Dr. Murley,

In accordance with Appendix A to Operating License DPR-49, Technical Specifications, Sections 6.11.3 and 4.7.A.2.g, and 10 CFR Part 50, Appendix J, Section V.B, please find attached a copy of the Duane Arnold Energy Center (DAEC) "Reactor Containment Building Integrated Leak Rate Test" for the 1988 Refueling Outage. Included as appendices to this report are the results and analysis of the Type B and Type C tests that were also performed prior to and during the refueling outage.

As documented in the attached report, testing conducted prior to startup from the 1988 Refueling Outage demonstrated that the DAEC primary containment leakage rate is within allowable limits. The next Type A test is currently scheduled to occur during the Cycle 10/11 Refueling Outage in 1990.

I trust you will find the information provided satisfactory. Should you have any questions regarding this submittal, please contact this office.

Very truly yours,

Daniel L. Mineck
Manager, Nuclear Division
