SUBJ: Duane Arnold Energy Center  
Docket No: 50-331  
Op. License No: DPR-49  
Reporting of Changes to the  
Quality Assurance Program, UFSAR Chapter 17.2  
FILE: Q-98, A-365

Dear Dr. Murley:

This letter and the attachment are submitted in accordance with the 10 CFR 50.54(a)(3) requirement to report, at least annually, changes to the quality assurance program description that do not reduce commitments.

Our previous submittal was in February 1989, and the revised quality assurance program at that time was found to be acceptable to the NRC. This new submittal describes organization changes within the Quality Assurance Department effective 02/05/90. Other changes are editorial in nature. However, these changes neither affect the organizational separation existing for the Quality Assurance Department nor diminish the effectiveness of the quality assurance program.

Attached is a description of our current quality assurance program as set forth in the UFSAR/DAEC-1, Chapter 17.2, Quality Assurance During the Operations Phase, Rev. 9, 02/01/90. The Revision 9 changes are identified by vertical lines in the right margin keyed to a "9" indicating that a change occurs at those locations. Our internal evaluation is available in our Quality Assurance Department for your review.

The quality assurance program, as revised, continues to satisfy the requirements of 10 CFR 50, Appendix B, and the DAEC Safety Analysis Report program description commitments previously accepted by the NRC.
