Dear Dr. Murley:

As reported in Reference 1, a Containment Integrated Leak Rate Test (CILRT) was conducted during the 1990 refuel outage. The NRC concluded that the "as-found" test results did not meet the acceptance criteria of 0.75 L_a. (See Reference 2.)

In accordance with the exemption granted in June, 1990 (Reference 3), and pursuant to the requirements of Section III.A.6.(a) of Appendix J to 10 CFR Part 50, we are herewith providing a schedule of future CILRTs for the Commission's review and approval (Attachment).
