Washington, DC 20555

Subject: Duane Arnold Energy Center
Docket No: 50-331
Op. License No: DPR-49
Compilation of Current Licensing Basis
(CLB),
Reference: "Compilation of the Current Licensing
Basis: Request for Voluntary
Participation in Pilot Program (Generic
Letter 92-03)," transmitted by letter,
J. Partlow to All Licensees, March 19,
1992
File: A-101b, A-227

Dear Dr. Murley:

The referenced letter solicited industry participation in a voluntary pilot program to compile the current licensing basis (CLB). We are currently reconstituting our Design Basis. Soon, we will start building an on-going Commitment Tracking system. These are both IELP-initiated items on the current DAEC Integrated Plan. Because of the interrelationship of CLB with these programs, we will seriously investigate the advantage of concurrent compilation of a CLB.

It is our understanding that a workshop discussing this matter is planned for the week of June 22. We are members of the Regulatory Commitment Tracking Group, co-sponsor of this workshop. It is our intention to participate in this workshop so that we can discuss with you such things as scope, schedule, and level of effort required to support a pilot program.

After we have attended the workshop and assessed the impact on our current plans and schedules, we will inform you if we decide to participate as a pilot plant.
