

September 20, 2011

Mr. David Walter
Alabama Office of Radiation Control
P. O. Box 303017
Montgomery, AL 36130-3017

Dear Mr. Walter:

I would like to personally thank you, on behalf of the U.S. Nuclear Regulatory Commission (NRC), for participating as a panel member in NRC's August 11-12, 2011, Public Workshop for Discussion of Topics Related to NRC's Medical Regulations. We appreciate both the time you spent in preparing your remarks for this workshop, and your contribution to the panel discussions, as well as your thoughtful insight and responses during the public discussions.

NRC staff is working to develop a definition for Medical Events which can ensure the safe use of radioactive materials while providing flexibility to account for medically necessary adjustments and the terms and thresholds for reporting medical events to the NRC and patients. Your efforts, in combination with other stakeholders who attended, made this public meeting an important part of the information collection process as we move forward with the development of draft rulemaking language to address proposed amendments to Title 10 of the *Code of Federal Regulations* Part 35.

Please note that all documents related to the public meeting, such as final presentations, list of panel members, statements and transcripts, will be added to the Workshop website at <http://www.blsmmeetings.net/NRCMedicalRulemakingWorkshop/> within the next two weeks.

We appreciate the opportunity to work with you on this important project. Please do not hesitate to contact me or any member of my staff if you have further questions or inquiries on this important subject.

Sincerely,

/RA/

Cynthia A. Carpenter, Acting Director
Office of Federal and State Materials
and Environmental Management Programs
