RE: License Renewal Request for US NRC Radioactive Material License Number 07-00455-02

To Whom It May Concern,

We are writing to inform you of our intent to renew US NRC Radioactive Material License Number 07-00455-02 for the DuPont Experimental Station in Wilmington, Delaware. This license is due to expire on August 31, 2011.

A previous amendment request (letter dated 6 June 2011) is currently under review by the US NRC to consolidate this license under another DuPont Radioactive Material License (DuPont Stine-Haskell Research Center, 07-13441-02) and is referenced by Mail Control Number 575556.

The 07-00455-02 license will expire before the completion of the consolidation review process. As such, we were advised by US NRC Region I to submit this letter of intent for license renewal to keep the 07-00455-02 license current during the consolidation review.

Please feel free to contact me if you have any questions.

Sincerely,

Michael B. Ohm
DuPont Wilmington Area Radiation Safety Officer
