**Subject:** Soil report and amendment request

Mike and Peter,

Per my conversation with Mike this morning, and upon your acceptance of our Final Status Survey report of Soils adjacent to Magill Hall, it is our desire to amend our NRC license (24-09296-02, Docket 33508) to modify by section 6, item H to remove the words "or in soil". In addition, we would like to modify section 21, item B, to remove the references to the letters regarding soil sampling.

Since in that section also refers to the "Decontamination and Survey Plan for Magill and Rhodes Halls dated August 2010, Revision 1", reference still needs to be maintained to that document since it outlines the procedures in current use for D&D of Magill Hall. It is the revised version of the 2006 plan referenced in part A. I'm not sure exactly how we handle that since soil sampling is a component of Revision 1.

Thanks,

Walt
