SUBJECT: DEPARTMENT OF HEALTH AND HUMAN SERVICES, LICENSE
AMENDMENT, CONTROL NO. 575551

Dear Mr. Ornot:

This refers to your license amendment request. Enclosed with this letter is the amended license.

Please note that Beth Tomasovic was added as an authorized user. The NRC does not list an assistant or back-up radiation safety officer on licenses. Also, any future correspondence related to license amendments should be submitted by a management representative to demonstrate to the NRC that licensee management is aware of changes in the radiation safety program. In your case, we understand that you are a management representative as well as the Radiation Safety Officer and should have been signed by you rather than Ms. Tomasovic.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits**, see our **toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 7:00 a.m. to 6:30 p.m. EST, Monday through Friday (except Federal holidays).
