Bob and Rich,

I'm available for a meeting this afternoon, tomorrow morning from 8 to 10 or 4 to 6, and Friday morning. After that I'll be out on vacation.

Please let me know if any of these possibilities work out for you.

Thanks,

Vanice

Rich, Vanice

Based on the LT/ET meeting we were suppose to talk about resources. It has been a week now and we need to at least set a meeting to discuss this or it will just fall off our plates. Let me know what you want me to do next concerning this subject. FYI, we are considering RIS 2006-21, NSIRs effort to develop and e-library of industry information. We specifically state that any information already provided under this program need not be submitted. If we setup a meeting on resources, I believe we have addressed the two major items that came out of the LT/ET meeting.

Bob

Rich,

I received three "installments" on SOARCA material from you. Many thanks for the info. I'll give Bob Prato a call today and I'll let you know if something new pops-up.

It was nice talking to you too this morning.

Have a great day,

Vanice

To All

We just received direction from the Office level to remind everyone that all information between the NRC staff and SNL relating to the SOAR-CA process, scheduling, budgeting, work authorization, etc. are to go through me. Charlie T is the technical lead for the project, therefore all technical decisions between NRC staff and SNL must go through Charlie. Charlie and I will keep each other informed. This is not intended to inhibit work related to specific area of responsibility or the work you are doing for SOARCA. Most of you are matrix into this project and I am confident that you know what contribution you are making to SOARCA, specifically. We also recognize that you need to be able to talk with your technical contacts at SNL freely to resolve technical issues or to be effective in moving your contribution to the program efficiently. What we are asking is that all program, process, spending, scheduling, and technical decisions are controlled. The intent here is to prevent the communication issues with SNL that came about over the last two weeks. This is our contribution to preventing any further communication problems, to keep the project focused, and to prevent any confusion in the minds of SNL or the staff. This approach is not intended to restrictive communication, but just a reminder on how the process is suppose to work.

If you have any questions, please let me know!!!

Thanks for your cooperation and all you have done to contribute to SOAR-CA!

Happy Holidays!

Bob

P.S. I will be in the office much of this holiday season. I hoping to be off 12/26, 28, 29 and 1 / 2. The only days I know I won't be in for sure is the 28th and 29th.
