Bob -

- regarding the other 5 licensees (w/PB as the exception), I think it is appropriate for RES to put the boilerplate letter together as Michelle Laur did back in Sept 06 (forwarded email is attached) and then coordinate with DORL to get it issued formally. You and I can contact (by phone) the individual licensees prior to issuing the letters out. We should get these letters out concurrent with the formal letters to Surry and PB.

- We provided comments/inputs to the milestone table. John Lubinski forwarded them to Farouk.

You have the NEI letter, I sent it with the earlier email.

You will need to get the press release from Scott Burnell, I don't have a copy. By the way, the press release went to Brian Shearon on Tuesday for approval, I assume it is to the EDO by now.

I am not sure what to do about the other 6 licensees, it was before my time. I have no record of anything going to the licensee. I can put a simple letter together if I can get a copy of the previous letter or you can if you like, it does not matter to me. Other than that, I default and/or will assist in any way NRR would like me to.

We expect to make several revisions over the next few months, at least one before the end of the FY, we will make that change then.

HRMS was down yesterday, the TAC is KC0230 .

Thanks for the update. I have a few questions/comments at this time:

1. Can we get a copy of the draft Press Release and NEI letter?
2. How do we plan on addressing the previous 6 plants (Fermi 2, Duane Arnold, Diablo Canyon, Salem, Seabrook, Peach Bottom) as far as followup communication to the letters that went out in Fall 2006. While the letters did not have any specific action items or due dates requested of the licensee, the letters did imply the licensee was selected for the project and requested their voluntary assistance. Maybe a closeout letter is appropriate?
3. A lesson learned from the Fall 06 licensee interface was that we did not coordinate the communication plan/effort w/Region before reaching out to the licensee. The comm plan should be updated so that we keep Region in the know.
4. You were going to get me a PM TAC no. Any luck?

Rich
