Thanks Bob. I have a couple of suggestions/questions:

1. should we title the info needs as "Initial Information Needs" (in lieu of Immediate Information Needs") in light of your interest in toning down the accelerated nature of the request to the licensee?
2. Regarding the program schedule,
 - is the expectation that RES will obtain the detailed information needs from PM and Surry following completion of the site visits; if not, when is the target date for receiving the needed information?
 - I noticed the previous draft had 9/30/07 as date to "Perform Analyses." Was this the date RES was still shooting for to complete PM and Surry CAs or was there a change in this milestone?
