---

PMs - as an update to my previous message, we are still not ready for you to contact the licensees as explained below. Both sites have been notified; however, we are still standing by for confirmation/agreement from them as a participant in the initial SOARCA assessment.

Again, I'll notify you once we're ready to make the calls to your respective licensee.

Thanks,  
Rich

PMs,

As I've discussed with some of you, RES will be developing a State-of-the-Art Consequence Analyses (SOARCA) over the next 2 to 3 years. Back in the Fall of 2006, your respective plants were notified (by phone and by formal letter listed below) that they were selected as a participant in the initial scope of the SOARCA project.

Since that time, there have been some changes in the scope of the project/analyses and implementation process. One of the updates to the project plan was the re-selection of the initial plant participants from your (previously selected) respective plants to Surry and Peach Bottom. We (myself, the Surry & PB PMs) plan to make our initial contact with the licensee this afternoon to discuss their participation, get their acknowledgement, and to inform them that the related press release is expected to be issued on Friday, 4/27.

The expectation from DORL is for the PMs for the previously selected plants, to contact their respective licensing POCs and inform them of this update as well. I have attached a brief script/talking points for your advanced read and as a guide when you contact your licensee. If you are more comfortable w/me making the call, please let me know who is your licensing POC, and I will be more than happy to make the calls for you (or with you). We would like to make these phonecalls as soon as we get Surry and PB's acknowledgement today. That said, I'll let you know when I've got the green light before you make your calls. In general, the points you will cover include:

1. that your site is no longer an initial participant in the SOARCA project (contrary to the letter that was sent to them in the Fall of 2006) due to the updated SOARCA plan.
2. A press release will be issued on Friday 4/27, providing an overview of the SOARCA project and indicating that Surry and Peach Bottom will be the initial participating plants.
3. A formal letter from the NRC to each previously selected plant will be sent to them which will address this project plan change and "close out" the previously sent Fall 2006 letter (by early next month).
4. If they have any questions, they can contact me (I'll be the NRR/DORL POC for SOARCA matters :-).
