---

Don't know the answer off hand, but can probably find out by looking at Appendix A of Info digest. Would you like for me to do that, or someone on your end? If me, I can probably get back to you later this week as I've got a number of emergent tasks due.

Thanks,  
Rich

**Subject:** Question

Rich,

Do you happen to know the answer to these questions-

How many other operating plants are BWRs with mark I containments?

Also, how many other plants are Westinghouse reactors with subatmospheric containments?

Really, what I am trying to answer is with Peach Bottom and Surry, what percentage of the operating fleet do they cover?

Thanks,

Richard Chang
