Bob,

As we discussed, Barry just informed me that he has confirmation from the applicable technical groups - Engineering, OPS, and PRA, that they can support (and prefer) your visit to the site tomorrow at 1pm. Barry Garber is expecting your call this evening - he can be reached at 757-358-4415. Please keep Siva and I posted on your followup activities, emails, and outcomes w/Surry on this effort.

As for Peach Bottom, John Hughey expects to hear back from the licensee sometime tomorrow.

Thanks,  
Rich

>>> Siva Lingam 9/5/2007 11:00 AM >>>

Barry Garber called me yesterday evening, and he will let me (and Richard Guzman) know by noon time today after talking to appropriate people. As soon as I hear something, I will pass the information.

Rich

I know I am pushing on this subject but any feedback would be helpful. I believe it is critical that we have these site visits complete before we finalize our input to allow us to finalize our output from MELCOR.

Rich

About 3 weeks ago, Barry Graber (Surry) requested that we schedule another site visit to go over the details of our effort to date, e.g., sequences, mitigative measures, etc. Based on the level of interest for interaction, I believe that PB would welcome a similar effort on our part. I finally received approval to go forward with these visits. I am planning to go with no more than two additional staff members (1 PRA and 1 MELCOR person) for a one day (about 4 hours) visit to the sites to review everything we have so far, and to gather any additional information that we may need. We will provide them with a list of information missing before showing up to the site.

What I need from you is a verification that Surry would still like this visit and the PB want this visit. I would like to plan them ASAP, Surry as early as this Thursday and PB early next week or the following week. I am suppose to be on AL next week, but will gladly make the site visit for a day if needed.

Bob
