Date: Monday, September 17, 2007 10:03:17 AM

Jimi, Bob, - we are still waiting to hear back from Perry for a call today. The PM will try to pulse them again for a call this afternoon.

I'm assuming a Perry call for Tuesday is out of the questions due to your trip to PB, am I correct?

>>> Thomas Wengert 9/17/2007 9:14 AM >>>

I'm still waiting for a callback from the licensee. I left another message this morning - I've suggested we try for later today. I'll let you know when I hear back.

Tom - any word back from Perry on having a telecom? If we are to have it today, I will have to join by bridge as I am working from home. 9/18 might be a challenge to have the call as RES (Bob Prato) will be at a site visit that was just planned last Friday.

Thanks,
Rich

Henry,

I've been requested to schedule a conference call this week or next to discuss Perry's possible participation in the State-of-the-Art Reactor Consequence Analysis (SOARCA) project.

NRC Research is seeking participants to take part in the next phase of the SOARCA project. Surry and Peach Bottom were selected earlier this year and have actively participated by providing, on a voluntary basis, site-specific information to support the project. Completion of these two sites is projected for Fall 2007. Research would now like to reach out to other possible participants to assist/support remaining information needs of the project (completion of the entire project is targeted for Fall 2008). A number of factors, such as, reactor type, containment type, population density, analysis models, plant schedules, etc. played a role in Research's selection of possible participants.

I'd like to set up an information call this week or next (latest by 9/18) to discuss this effort further and to request Perry's participation in the project; a list of talking points for the call is attached. NRC participants will be myself, the DORL SOARCA PM (Rich Guzman), and team leaders (Bob Prato and Jimi Yerokun) from Research. Research will explain the project and answer your questions. I estimate a 30-45 min for the call.

Please let me know when you, et al., would be available for the call.

Thanks,

Tom Wengert
