Date: Thursday, April 01, 2010 3:31:00 PM

Scott - PB has confirmed receipt of the email w/attachments. See John's message below - he is waiting to hear back from the licensee on their proposed completion date.

Also, note that I will be on leave from 4/5 - 4/9. Please work directly w/the plant PMs (with my on cc:) for any NRR/DORL support.

Still standing by for Surry confirmation.

Rich

Great. Thanks for that status - I'll forward that info to Scott. For any subsequent updates thru next week, please go ahead and provide them directly to Scott (I will be on leave from 4/5 - 4/9).

Karen - you're on cc:, also for your awareness. Any word yet from your licensee?

Thanks,
Rich

Rich,
Exelon got the SOARCA info. However, in talking with Frank, he said that he isn't sure that they will be able to have the review done by 04/16 as requested. Frank is going to let me know what date they can support.
John

John,
Exelon has received the SOARCA documents and is able to open the files.

Subject: SOARCA documents for review by Peach Bottom Atomic Power Station

Frank,

Please find attached two SOARCA documents. These attachments include sections of the SOARCA NUREG for purposes of performing a fact check/error check as we discussed last week. The first document is a compiled collection of 13 pages extracted from the SOARCA Summary document which contains individual pages with Peach Bottom specific information to be checked for accuracy. The second attachment is the Peach Bottom Integrated Analysis document (Appendix A, 179 pages) in its entirety to be fact checked/error checked.

As we discussed in our teleconference last week we are requesting that Exelon check the document for accuracy of facts and statements that pertain to plant specific information as stated in the documents. Consistent with the informal agreement RES made with SOARCA licensee participants, we are requesting a review the draft NUREG for any plant-specific factual errors only. Additionally, as a SOARCA participating licensee, you are receiving this information in its pre-decisional state which is not ready for release to the public. These documents are DRAFT and will be edited further and may include changes to how results are reported, before they are released by the NRC. Therefore, I would like to emphasize that this document should be controlled in such a manner as to limit its distribution to only those personnel necessary to complete the fact check/error check, as discussed in our teleconference with you last week. Under no circumstances is any information in these attachments to be released to the public.

We are asking that you complete your fact check/error review by April 16, 2010. RES personnel are available throughout the review period for discussions/questions regarding this request. Please contact me at 415-3204 with any questions. In addition, I would also appreciate a response indicating that you received and were able to open the attachments.

Best Regards,
John Hughey
NRR/DORL/LPL 1-2
Peach Bottom Project Manager
